euromicron again demonstrates its powerful growth and earnings strength in the TOP 100 ranking of German medium-sized enterprises, climbing from 61st to 32nd

euromicron AG captures accolade from the Munich Strategy Group (MSG) and the daily newspaper "Die Welt" for the third straight time – and once again sharply improves its placement

As part of an extensive analysis of more than 1,000 companies over a five-year period, the Munich Strategy Group (MSG) and the daily newspaper "Die Welt" have again ascertained and acknowledged the 100 best German small and medium-sized enterprises. The ranking is based on two criteria of equal weighting: average sales growth and average profitability ratio in the years 2006 to 2011.

In 2012, euromicron AG was able to capture a place in this ranking for the third time in a row and move up from 61st last year to 32nd. As a result, euromicron AG is one of the 100 most successful German SMEs in 2012 as well.

The hallmark of these companies is that they "are outstanding over a lengthy period of time in their field of competition, are distinguished by continuity in corporate development, stable sales growth at a high level, constantly high income and strategic vision, are among the market leaders in their segments or regions and generate above-average growth and EBIT

thanks to their great innovativeness," according to the study's tribute.

It also came to the conclusion that the analyzed businesses even left large companies in Germany trailing well behind when it came to earnings strength and innovativeness. "Between 2006 and 2011, the TOP 100 companies all grew more strongly on average than the 500 largest enterprises in Germany," states the responsible MSG consultant, adding: "Whereas the large groups grew by an average of almost seven percent, the SMEs did so by an average of almost ten."

euromicron AG is thus one of the companies that "has occupied a top place in the ranking due to their excellent performance in corporate governance, customer orientation and outstanding products over the past five years and forms a nucleus for growth, innovation and employment in Germany."
