The company and the Group

CCS® Connectivity & Cabling System develops, manufactures, and delivers copper and fiber optic solutions for specific applications in enterprise, commercial and residential environments.

Leader in Italy by market share, **CCS® Connectivity & Cabling System** is a registered trademark owned by Qubix SpA, an Italian company, supplier of copper and fiber optic structured cabling components, and networking equipments.

Hexatronic Group consists of +50 international companies with a total of +1950 employees. The headquarters are located in Sweden. Hexatronic offers a complete range of products for passive fiber optic and copper infrastructures. The group owns 12 production facilities of fiber optic cables, micro tubes and connectivity components and it is present in Europe, North America and the Pacific area. The companies of the group work every day to improve the product range and to offer customized training programs and field support.

Research and *development*

The design and development of our systems are based on a simple and efficient concept: meeting the requirements of the network professionals with products and services tailored to their needs and responding to three fundamental requirements: easy, quick and correct installation.

We are devoted to research and to develop the most innovative signal transmission cables and connecting hardware. Thanks to the membership to category associations like CEI and BICSI, we contribute to the drafting of norms, thus being always updated on the latest trends and future developments.

Quality and compliance

The combination of the continuous research and the high quality of our products, recognized at international level by independent accredited laboratories according to the latest international norms, are the keys to the success of the CCS® system.

Our CCS® Easy Crimp and Easy Crimp Compact cabling systems are designed to provide the best performance in terms of reliability, longevity and transmission characteristics and, at the same time, ensure easy and quick execution of the termination with significant installation cost savings.

We comply with the European directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE).

3P Third Party Testing ApS

Certified by Notified Bodies according to the norms ISO/IEC 11801, ANSI/TIA 568 and EN 50173, CCS® cables are compliant with CPR Directive (UE/305/2011) that defines, with the different Euroclasses, the performance to fire production, opacity, acidity and corrosiveness of smokes and flaming droplets that can propagate fire.

All CCS® cables are available on stock and are labelled according to the Directive of the European Regulation for Construction Products (CPR).

Efficient logistics

The 3500 square meters warehouse and goods readily available allow us to offer a prompt delivery service for 80% of the articles. Warehouse lay-out managed by a computerized system together with optimized goods handling and identification grant a great logistics service.

Our Shipping Department offers support and optimized solutions to our customers for the organization of their shipments.

Partnership program

Our sales philosophy is based on long-term partnerships with our customers.

CCS® GOLD and **SILVER** distribution partners have several benefits according to their distribution class/contract and take advantage of marketing and technical support, preferential pricing, pre-and post-sales training. We don't just supply products, we provide added value to our partners by offering services and know-how that allow them to be market leaders.

A specific training course program is offered to our Accredited Partners and therefore acquire best knowledge of the CCS® cabling systems.

WE ARE PRESENT IN
>20
COUNTRIES IN THE EMEA REGION

Technical support *service*

Our technical support service is carried out by a team of engineers and is at our customers' disposal to offer **personalized support** during the design and installation phases as well as advice and assistance with technical clarifications regarding selection and installation of our products.

A dedicated download centre at:

www.ccs-cabling.it

gives you quick access to useful documents like data-sheets, certificates and tutorial videos. You can follow us also on social media like LinkedIn, Facebook and YouTube to be always updated on our latest news and events. Always at your side, our Marketing Department supports you with catalogues, brochures and sample kits and provides assistance to the events organized by our partners.

Training and warranty

CCS® offers qualified training courses on copper, fiber optic and FTTx systems to become CCS® Accredited Installer. The courses are held by our engineers in our Qubix Academy Space and offer theoretical and practical knowledge. Webinars are also organized on a regular base.

CCS® Warranty covers the performances on the application designed to operate over the installed classes of the cabling systems in accordance with the ISO/IEC 11801, ANSI/TIA 568 and EN 50173 international standards. They must exclusively be designed, realized and installed by Accredited CCS® installers who use full CCS® branded connecting hardware and cables and have followed CCS® Warranty procedures.

Copper cabling system

Complete solution of copper structured cabling system branded CCS®, including copper cables, cabling components and accessories.

Performance, reliability and easy installation are the main characteristics and advantages of the system designed and realized to comply with the requirements of ISO/IEC 11801, EN 50173, ANSI/TIA 568 international standards.

The certifications issued by independent laboratories and the Warranty up to 30 years guarantee the maximum performances in terms of reliability and quality.

For networks of new generation up to 10 Gigabit and high density installations, the series Easy Crimp Compact grants high performances, efficiency and reduced dimensions of the components. Totally toolless, this series allows for a quick and easy termination without the use of any termination tool.

Easy Crimp is CCS® cabling solution for the networks of commercial buildings. The unique termination system so much appreciated by installers is simple and quick and it grants an immediate benefit in terms of total cost of the system. It supports PoE++ installations till 90W and suitable from 1G to 10G Ethernet.

Suitable for cabling systems with speed of 1G and PoE applications up to 15,4W, the 110 system can be used in residential buildings with a limited number of links. The termination is performed through an impact tool on a IDC110 termination type.

PLUGS

Designing a copper cabling system, it is fundamental to properly evaluate the field of application and the installation environment. For Enterprise settings like Datacenter, IT rooms, hospitals or universities, the Easy Crimp Compact system is the ideal solution for the ease of use and the compact dimension of the components.

In commercial environments like schools, offices or shops where it is asked a high-speed and reliable connectivity, the Easy Crimp range of products can offer wide infrastructure solutions. For the residential cabling the 110 system solution is still a highly used system.

Cables

The wide range of cables branded CCS® includes products suitable for data, video and phone signals transmission according to the latest transmissive protocols with constructive solutions suitable to the installation in harsh environments.

CAT 5E, 6, 6A, 6A, 7, 7A cables are certified by independent laboratories according to ISO/IEC 11801, EN 50173, ANSI/TIA 568 international reference standards.

CPR - CONSTRUCTION PRODUCTS REGULATION

CPR is a European Regulation [EU/ 305/2011] effective from 2017 setting the conditions for the sale of construction products and for the use of the CE marking, defining METHODS AND CRITERIA to classify construction products according to their fire behaviour (Euroclasses) including communication cables, both copper and fiber optic.

According to the reaction-to-fire performances there are 7 EUROCLASSES followed by the acronym “ca” subscript (cable) with growing performances. Each Euroclass defines minimum requirements for heat release and flame propagation specifying also additional criteria:

	EUROCLASS	DESCRIPTION	INSTALLATION ENVIRONMENTS *
HIGH PERFORMANCE		Very low reaction to fire	Buildings with high crowd density and difficult access to escape routes and/or very high risk for goods/equipments. Example: road/train galleries, very high buildings open to public like hotels, hospitals, retirement houses.
		Low reaction to fire	Buildings with high crowd density and easy access to escape routes and/or high risk for goods/equipments. Example: theatres, cinemas, malls
		Moderate reaction to fire	Basic Euroclass for generic installations in some countries
BASIC PERFORMANCE		Basic reaction to fire	Basic Euroclass for generic installations in some countries
FLAMMABLE		Undetermined reaction to fire	Basic Euroclass for generic installations in some countries

It is up to the EU member states to define the fire reaction class in relation with the installation environment.

ADDITIONAL CRITERIA SPECIFICATIONS FOR EUROCLASS Dca - Cca - B2ca

S - SMOKE

release and opacity of smoke (s1, s2, s3)

s1 little smoke production and low smoke propagation

s1a s1 plus transmittance value according to en 61034-2 $\geq 80\%$

s1b s1 plus transmittance value according to en 61034-2 $\geq 60\%$ and $< 80\%$

s2 moderate smoke production and propagation

s3 potentially strong smoke production and propagation

d - FLAMING DROPLETS

dropping of flaming particles that can propagate fire (d0, d1, d2)

d0 no flaming droplets

d1 no flaming droplets that last more than 10 seconds

d2 potentially long-lasting flaming droplets

a - ACIDITY

emission of acid gases during the fire (a1, a2, a3)

a1 slightly acid smokes

a2 moderately acid smokes

a3 potentially high acid smokes

DECLARATION OF PERFORMANCE (DOP)

The Declaration of Performance (DoP), is the official document where the manufacturer identifies the product, describes the performance in relation to its essential characteristics such as fire reaction according to EN 50575 and emission of harmful substances based on the Euroclass of the product itself.

HOW TO GET THE DoP

All CCS cables packagings - reels or boxes bear a QR code on the label. Scanning this code you will be directed to a web page where you can download the DoP of the requested product.

Braid screen on the overall

According to ISO/IEC 11801 standards, the first letter of the acronym refers to the global screening, while the second letter describes the screening of the single pairs. TP means twisted pairs.

R7AST4H23 S/FTP PIMF

S/FTP CAT 7A, 4-pair cable (100 Ohm) PIMF with each pair shielded with AL/Mylar tape and overall tinned copper braid, FR LSZH (Low Smoke Zero Halogen) flame and fire retardant jacket, tested up to 1 GHz. Ideal for the realization of transmission channels of Class Fa.

Applications and performance

Cable suitable for the realization of generic cabling systems according to EN 50173; ISO/IEC 11801.

Ideal for indoor applications in Class D, E, Ea, F and Fa over 10 GbE on IEEE 802.3an, PoE/PoE+/ PoE++ protocols. Electrical characteristics exceed Category 7A requirements.

Reference standards

Data transmission cables of Category 7A according to ISO/IEC 11801; IEC 61156-5; EN 50173-1.

Construction characteristics

Inner conductors - material/diameter	Solid bare copper/AWG 23/1 (0,58mm)
Insulation - material/diameter	Foam skin PE max. diam. 1,35
Pair Shield	Al/Mylar tape
Overall shield	Tinned copper wire braid
Cable diameter	7,8 ± 0,5 mm
Outer jacket - material/color	LSZH/Yellow RAL 1021
Lead-free	Yes
Cable weight	63 kg/Km

Suitable for 10 Gigabit Ethernet
Tested up to 1 GHz

Mechanical and environmental properties

Use	Indoor
Bend. radius during installation	8 x outer diameter
Bend. radius after installation	4 x outer diameter
Max pull strength	110 N (11 kg max.)
Installation temperature	From 0°C to +50°C
Operating temperature	From -10°C to +60°C

Fire behaviour

CPR Regulation	EN 50575
Fire behaviour	EN 50399

M0502831	R6A-UT4H23 U/UTP CAT6A 4x2xAWG23/1 - unshielded - LSZH	Eca	500 mt

R6A* UT4H23 U/UTP

U/UTP CAT6_A unshielded 4-pair cable (100 Ohm) with cross separator, LSZH (Low Smoke Zero Halogen) flame and fire retardant jacket, tested up to 500 MHz. Suitable for the realization of 3rd generation horizontal cabling of Class E_A.

Applications and performance

Cable suitable for the realization of generic cabling system according to EN 50173; ISO/IEC 11801 .
Ideal for indoor applications in Class D, E and E_A up to 10 GbE over IEEE 802.3an and PoE/PoE+/PoE++ protocols. Electrical characteristics exceed CAT. 6_A requirements.

Reference standards

Force Technology approval for data transmission cables of Category 6_A according to ISO/IEC 11801-1/2:2017; IEC 61156-5:2020 Ed.3; EN 50173-1/2:2018; EN 50288-11-1: 2012; ANSI/TIA-568-2.D, Alien crosstalk PS ANEXT and PS AACR-F parameters included.

Construction characteristics

Inner conductors - material/diameter	Solid bare copper/AWG 23/1 (0,57 mm)
Insulation - material/diameter	Solid PE max diam. 1,09 mm
Cable diameter	8,2 ± 0,3 mm
Outer jacket material/colour	LSZH/Violet RAL 4005
Lead free	Yes
Cable weight	60 kg/km

Suitable for 10 Gigabit Ethernet
Tested up 500 MHz

Mechanical and environmental properties

Use	Indoor
Bend.radius during instalation	8 x outer diameter
Bend.radius after installation	4 x outer diameter
Max pull strength	110 N (11kg max.)
Installation temperature	from -10°C to +60°C
Operating temperature	from -10°C to +60°C

Fire behaviour

CPR Regulation	EN 50575
Fire behaviour	EN 50399
	EN 60332-1-2; CEI 20-35/1-2
Acid gas emission	EN 60754-2; CEI 20-37/2-2
Smoke density	EN 61034-2; CEI 20-37/3-1

Electrical characteristics at 20°C

DC loop conductor resistance	19 Ohm/100m
Insulation resistance	5 GOhm x km
Mutual capacitance	50 pF/m
Capacitance unbalance	1600 pF/km
NVP nominal velocity of propagation	66,7%
Max. propagation delay	534 ns/100m
Characteristic impedance	100 ± 15 Ohm

*according to EN 50288-11-1 (2012), IEC 61156-5(2012)

R6A-UF4H23 U/FTP

U/FTP CAT. 6A, 4-pair cable (100 Ohm), foil shielded with an Aluminum/polyester tape applied to 2-pair units, FR LSZH (Low Smoke Zero Halogen) flame and fire retardant jacket, tested up to 500 MHz. Suitable for the realization of transmission channels of Class EA.

Applications and performance

Cable suitable for the realization of generic cabling systems according to EN 50173; ISO/IEC 11801.

Ideal for indoor applications in Class D, E and EA up to 1GbE over IEEE 802.3an and PoE/PoE+/PoE++ protocols. Electrical characteristics exceed Category 6A requirements.

Reference standards

Force Technology approval for data transmission cables of Category 6A according to ISO/IEC 11801-1/2:2017; IEC 61156-5:2012 (Ed.2.1); EN50173-1/2:2018; EN50288-10-1:2012; ANSI/TIA-568.2-D.

Construction characteristics

Inner conductors - material/diameter	Solid bare copper/AWG 23/1(0,56 mm)
Insulation - material/diameter	Foam skin PE max diam. 1,30 mm
Shields on 2-pair units	Al/PET tape
Cable diameter	6,8 ± 0,3 mm
Drain wire	CuSn
Outer jacket - material/color	LSZH/Orange RAL 2003
Lead-free	Yes
Cable weight	60 kg/Km

Suitable for 10 Gigabit Ethernet
Tested up to 500 MHz

Mechanical and environmental properties

Use	Indoor
Bend. radius during installation	8 x outer diameter
Bend. radius after installation	4 x outer diameter
Max pull strength	110 N (11kg max.)
Installation temperature	From 0°C to +60°C
Operating temperature	From -10°C to +60°C

Fire behaviour

CPR Regulation	EN 50575
Fire behaviour	EN 50399
	EN 60332-1-2; CEI 20-35/1-2
Acid gas emission	EN 60754-2; CEI 20-37/2-2
Smoke density	EN 61034-2; CEI 20-37/3-1

Electrical properties at 20°C

DC loop cond. resistance	19 Ohm/100m
Insulation resistance	5 GOhm x km
Capacitance unbalance	1600 pF/km
NVP nominal velocity of propagation	78%
Max. propagation delay	534 ns/100m
Characteristic impedance	100 ± 15 Ohm

*according to EN 50288-10-1 (2012), IEC 61156-5(2012)

CPR 6727-C SF/UTP

SF/UTP CAT5E, 4-pair cable (100 Ohm), shielded with an Aluminium polyester tape and tinned copper braid, LSZH (Low Smoke Zero Halogen) outer jacket, flame retardant, tested up to 200 MHz. Suitable for the realization of transmission channels of Class D.

Applications and performance

Cable suitable for the realization of generic cabling systems according to EN 50173; ISO/IEC 11801.

Ideal for indoor applications in Class D up to 1GbE on IEEE 802.3ab and PoE/PoE+/PoE++ protocols. Electrical characteristics exceed Category 5Enhanced requirements.

Reference standards

Data transmission cables of Category 5E according to ISO/IEC 11801; IEC 61156-5; EN50173-1; ANSI/TIA-568.2-D.

Construction characteristics

Inner conductors - material/diameter	Solid bare copper/AWG 24/1 (0,51mm)
Insulation - material/diameter	Solid PE max. diam. 1,07 mm
Cable diameter	6,1 ± 0,3 mm
Overall shield	Al/PET tape + CuSn braid + CuSn drain wire
Outer jacket - material/color	LSZH/Grey RAL 7032
Lead-free	Yes
Cable weight	46 kg/Km

Suitable for Gigabit Ethernet
Tested up to 200 MHz

Mechanical and environmental properties

Use	Indoor
Bend. radius during installation	8 x outer diameter
Bend. radius after installation	4 x outer diameter
Max pull strength	110 N (11kg max.)
Installation temperature	From 0°C to +50°C
Operating temperature	From -10°C to +60°C

Outdoor cables

Category 6

R6FT4YPE23 F/UTP PVC-PE double jacket

F/UTP CAT6, 4-pair cable (100 Ohm) with cross separator, shielded with an Al/PET tape, double outer jacket: PVC flame retardant inner jacket and PE outer jacket. Tested up to 250MHz. Suitable for the realization of transmission channels of Class E.

Applications and performance

Cable suitable for the realization of generic cabling systems according to EN 50173; ISO/IEC 11801.

Ideal for outdoor applications in Class E up to 1GbE over IEEE 802.3ab and PoE/PoE+/PoE++ protocols. Electrical characteristics exceed Category 6 requirements.

Certifications and approvals

Data transmission cables of Category 6 according to ISO/IEC 11801-1; IEC 61156-5; EN 50173-1; ANSI/TIA-568.2-D. Certified CEI UNEL 36762 on the coexistence in the same conduit with power cables up to 0,6/kV and used for systems with nominal voltage to ground (U_0) up to 400V.

Construction characteristics

Inner conductors - material/diameter	Solid bare copper/AWG 23/1 (0,55mm)
Insulation - material/diameter	Solid PE max. diam. 1,13 mm
Cable diameter	7,9 ± 0,3 mm
Overall shield	Al/PET tape + CuSn drain wire
Inner jacket - material/color	PVC/White RAL 9018
Outer jacket - material/color	PE/Black RAL 9005
Lead-free	Yes
Cable weight	61 kg/Km

Suitable for Gigabit Ethernet
Tested up to 250 MHz

Mechanical and environmental properties

Easy Crimp Compact

Developed for new generation networking and multimedia applications and to satisfy more demanding electrical and transmission performance requirements in high density environments, the Easy Crimp Compact cabling system of Category 6, 6A and 6_A maintains high transmission properties in a very compact size which allows installation in high density patch panels. The Easy Crimp Compact snap-in quick system grants high speed of operation and rapid execution of the termination without the use of crimp and impact tools, thus granting installation costs much lower than those of more traditional systems.

Easy Crimp Compact

Category 6

Jacks

Description

CAT 6 Component CCS RJ45 unshielded jack for the realization of Class E transmission channels.
The toolless "Easy Crimp Compact" termination system makes the connection very easy and time saving.
Certified by independent labs in accordance with Cat. 6 requirements on the single component, it supports 10Gigabit Ethernet (IEEE 802.3an) and is suitable for PoE/PoE+/PoE++ applications.

Performance

Certifications	Force Technology Category 6 Component Level
Standards	ISO/IEC 11801 1/2:2017 IEC 60603-7-4:2010 EN 50173-1/2:2018 ANSI/TIA-568.2-D IEC 60512-99-002:2019
Warranty	25 years on CCS® system

General characteristics

Material	Polycarbonate, flame-retardant plastic housing with high mechanical resistance, 8 nickel bronze contacts plated with 50 µm hard gold.
Connections	IDC insulation displacement for solid or stranded copper conductors from 22 to 26 AWG; double labelling colour scheme T568A/B, reusable wire organizer, toolless closing by snap-in termination flaps.
Installation	Keystone universal for installation on panels, faceplates, civil series adapters and outdoor boxes
Colour	Housing : White/Black Termination flaps: Grey

Easy Crimp Compact

Category 6

Patch panels

Description

CCS 24-port patch panel with 4 removable modules of 6 ports each, supplied with 24 Cat. 6 CCS® “Easy Crimp Compact” unshielded RJ45 jacks (Code 2002051) or blank (Code 2002013). Suitable for transmission channels of Class E. The “Easy Crimp Compact” termination system makes the connection fast and easy without the use of tools allowing a considerable time saving during the installation phase. Certified by independent testing laboratories in accordance with Cat. 6 requirements on the single component, they support 10Gigabit Ethernet (IEEE 802.3an) and are suitable for PoE/PoE+/PoE++ applications.

Performance

Easy Crimp Compact

Category 6A

Jacks

Description

CAT 6A Channel CCS RJ45 shielded jack for the realization of Cat.6A/Class E_A transmission channels.

Thanks to its reduced dimensions, it is suitable for high density installation solutions and can be installed on 1U – 48 positions (Code 2002049) and ½U – 24 positions (Code 2002048) CCS Compact patch panels.

The toolless "Easy Crimp Compact" termination system makes the connection very easy and time saving.

Certified in accordance with Class E_A requirements on the channel link, it supports 10Gigabit Ethernet (IEEE 802.3an) and is suitable for POE/PoE+/PoE++ applications.

General characteristics

Material	Die-cast metal housing, high impact, 8 nickel bronze contacts plated with 50 µm hard gold.
Connection	IDC insulation displacement for solid or stranded copper conductors 22 to 26 AWG; double labelling colour scheme indicating the two T568A/B connections, reusable wire organizer, toolless closing system by snap-in termination flaps.
Installation	Keystone universal for installation on panels, faceplates, civil series adapters and outdoor boxes.
Colour	Metal

Performance

Compliance	Cat.6A/Class E _A
Standards	ISO/IEC 11801-1/2:2017 EN 50173-1/2:2018 ANSI/TIA-568.2-D IEC 60512-99-002:2019
Warranty	25 years on CCS® system

EASY CRIMP COMPACT

Patch panels

Description

CAT 6_A CCS 24-port patch panel, supplied with 24 “Easy Crimp Compact” die-cast shielded RJ45 jacks for transmission channels of Class E_A.

The “Easy Crimp Compact” termination system makes the connection fast and easy without the use of tools allowing a considerable time saving during the installation phase. Certified by independent testing laboratories in accordance with Cat. 6_A requirements on the single component, they support 10Gigabit Ethernet applications (IEEE 802.3an) and are suitable for POE+ (IEEE 802.3at).

Performance

Certifications	Force Technology Category 6 _A Component Level
Approvals	ISO/IEC 11801-1/2:2017 (Ed. 1.0) IEC 60603-7-51:2010; EN 50173-1/2:2018 ANSI/TIA-568.2-D; IEC 60512-99-002:2019
Warranty	30 years on CCS system

Structure	Metal frame with 24 ports for Keystone Easy Crimp jacks; 8 position modules in ABS; mount release lateral screws cover with logos; jacks layout in two rows to exceed the Alien Next requirements; setting for connection to ground.
Equipment	1 CCS 24-port patch panel; 24 CAT 6 _A CCS “Easy Crimp Compact” die-cast shielded RJ45 jacks; cover for 8/16/24 positions modules; clear plastic label-holder for the personalized numbering; rear cable management; 24 dust-protection caps for the jacks; rack mount screws and nuts, cable ties.
Dimensions	19”, 1 Unit
Colour	Black

Easy Crimp Compact

Patch Panels

24 ports blank patch panel

Description

24-port blank patch panel suitable for keystone standard CCS RJ45 "Easy Crimp" and "Easy Crimp Compact" shielded and unshielded jacks.

Characteristics

Structure	Metal frame with 24 ports for Keystone Easy Crimp and Easy Crimp Compact shielded and unshielded jacks; ABS casing with 8-port cover; mount release lateral screws cover with logos: jacks layout in two rows; metal frame for the shielded jacks grounding.
Equipment	1 CCS 24-port blank patch panel; cover for 8 port-module; clear plastic label-holder; setting for connection to ground; rear cable management.

EASY CRIMP COMPACT

24 ports orientable blank patch panel

Description

24-port blank patch panel with orientable ports suitable for keystone standard CCS RJ45 "Easy Crimp Compact" shielded and unshielded jacks. The orientable ports highly ease the cabling management.

Characteristics

Structure	Metal frame with 24 orientable ports for Keystone "Easy Crimp Compact" shielded and unshielded jacks; jacks layout in two rows; metal frame for the shielded jacks grounding.
Equipment	1 CCS 24-orientable port blank patch panel; labels for port-numbering; rear cable management and cable ties; riveted cable which can be installed on both sides of the panel for the grounding of the jacks
Dimensions	19", 1Unit
Colour	Metal

Easy Crimp Compact

Field Plugs

Easy Crimp Compact Cat. 6A UTP

Description

CCS Easy Crimp Compact Cat. 6A unshielded RJ45 field plug used to terminate cables with solid or stranded conductors. Toolless plugs, no tool is needed for a quick and easy termination. Ideal for the realization of MPTL connections (Modular Plug Terminated Link) or patch cords of non-standard length. It is compliant to PoE/PoE+/PoE++ applications.

Characteristics

Material	Plug body in PC-FR, 8 contacts phosphor bronze alloy plated with 50µm of gold; steel cable gland
Connection	IDC insulation displacement for solid conductors 23-26 AWG and stranded 23-27 AWG; label indicating T568A/B connection schemes
Installation	On cables with solid and stranded conductors
Cable OD	From 5,5 to 8,5 mm

Performances

Certifications	UL 1863 Communications Circuit Accessories
Standards	ISO/IEC 11801-1/2:2017 EN 50173-1:2018; ANSI/TIA-568.2-D IEC 60603-7-41; IEC 60512-99-002:2019

2012026	Cat 6A STP Easy Crimp Compact field plug

Easy Crimp System

Developed for new generation networking and multimedia applications and to satisfy highly demanding electrical and transmissive performance requirements, the Easy Crimp cabling systems of Category 5E, 6 and 6A Channel provide the best performances in terms of reliability, longevity and transmission properties.

The unique Easy Crimp snap-in quick system allows high speed of operation and rapid execution of the termination without the use of impact tools, thus granting installation costs lower than those of more traditional systems.

Jacks

Description

CAT 5E CCS shielded and unshielded RJ45 jacks for transmission channels of Class D.
The “Easy Crimp” termination system makes the connection fast and easy without the use of tools allowing a considerable time saving during the installation phase.
Certified by independent testing laboratories in accordance with CAT 5E requirements on the single component, they support Gigabit Ethernet (IEEE 802.3ab) and are suitable for PoE/PoE+ applications.

Performance

Certifications	Force Technology Category 5E Component Level
Approvals	ISO/IEC 11801 1/2:2017 IEC 60603-7-2:2010; EN 50173-1/2:2018 ANSI/TIA-568.2-D; IEEE 802.3at
Warranty	20 years on CCS® system

General characteristics

Material	Polycarbonate, high-impact, flame-retardant plastic housing, metal coated (only for the shielded version). 8 nickel bronze contacts plated with 50 µm hard gold.
Connection	Reusable connection cap with ergonomic slots to facilitate the conductors positioning; IDC insulation displacement for solid or stranded copper conductors of diameter from 22 to 26 AWG; double labelling colour scheme indicating the two T568A/B connections, external cap for the termination protection.
Installation	Keystone universal snap-in for installation on panels, faceplates, civil series adapters and outdoor boxes.
Colour	Shielded version: Aluminum Grey Unshielded version: White/Anthracite

Easy Crimp System

Field Plugs

Easy Crimp CAT 5E UTP

Description

CCS unshielded plug used to connect cables with solid conductors.

With the tool-less Easy Crimp system, the connection is always fast and performing.

Ideal for the realization of "transition point" or patch cords out of standard length.

Characteristics meet and exceed CAT 5E - Class D requirements according to ISO/IEC 11801 and ANSI/TIA 568.2-D

Characteristics

Material	Flame retardant thermoplastic material with high mechanical resistance; 8 nickel bronze contacts plated with 50 µm hard gold
Connection	IDC insulation displacement for solid copper conductors from 23 to 24 AWG; double labelling colour scheme indicating the two T568A/B connections
Installation	On cables with solid conductors

Performance

Compliance	Category 5E – Class D
Approvals	ISO/IEC 11801-1/2:2017 EN 50173-1:2011 ANSI/TIA-568.2-D

Easy Crimp System

Coupler

In-line coupler Cat. 6A STP

Description

CCS in-line coupler Category 6_A shielded, ideal to extend existing copper links.
Toolless termination system for a quick and easy termination.
It complies with Cat. 6_A Class E_A performances, standard ISO/IEC 11801, EN 50173 and ANSI/TIA 568.2-D.

Characteristics

Material	Housing in zinc-alloy nickel plated; wire manager in PC-FR, flame retardant polycarbonate UL94 V0; IDC contacts in phosphor bronze tin plated
Connection	IDC termination; for solid copper conductors 22-26 AWG; double label with colour scheme T568A/B
Installation	On cables with solid conductors
Cable OD	From 6 to 9 mm

Performance

Certifications	Category 6 _A - Class E _A

Easy Crimp System

Accessories

24-port blank patch panel

Description

24-port blank patch panel suitable for keystone standard CCS RJ45 "Easy Crimp" and "Easy Crimp Compact" shielded and unshielded jacks.

Characteristics

Structure	Metal frame with 24 ports for Keystone Easy Crimp shielded and unshielded jacks; ABS casing with 8-port covers; mount release lateral screws cover with logos; jacks layout in two rows; metal frame for the shielded jacks grounding
Equipment	1 CCS 24-port blank patch panel; cover for 8 port-module; clear plastic label-holder; setting for connection to ground; rear cable management
Dimensions	19", 1Unit
Colour	Black

Code	2002012
Description	24-port blank patch panel for CCS Easy Crimp jacks

Crimp tool

Description

Tool useful for the cable preparation and termination. Helpful for cutting the cable jacket and pressing the protection cap on the Easy Crimp jacks.

Characteristics

Material	Thermoplastic , high impact, flame-retardant material
Mechanical features	Pressure system for the protection of the cap closing; length-reference for the cable jacket cutting; blade inserts for cables with higher/lower diameter
Colour	Black

Code	2004095
Description	Crimp tool for CCS Easy Crimp jacks

Nippers

Description

Flat blade nippers to cut the excess lengths of the cable conductors after CCS Easy Crimp jacks crimping.

Characteristics

Material	Made of steel; handles in thermoplastic material
Mechanical features	Spring return to the opening position; flat blade for precise cable cutting
Colour	Light blue handles

Code	2004094
Description	Flat blade nippers for CCS Easy Crimp jacks

110 cabling system

The CCS® 110 cabling system includes patch panels and Accessories of CATEGORY 5e and 6.

The IDC 110 termination is made by using a suitable impact tool.

Category 5E

Patch Panel

Description

CAT 5E CCS 24-port patch panel, preloaded with 24 shielded or unshielded RJ45 jacks with IDC 110 termination system for transmission channels of Class D. Characteristics meet and exceed CAT 5E – Class D requirements up to 100MHz according to the ISO/IEC 11801 and ANSI/TIA 568.2-D standards. They support Gigabit Ethernet (IEEE 802.3ab) applications and are suitable for PoE (IEEE 802.3af) applications.

General characteristics

Structure	Metal frame with 4 modules with 6 ports or with 3 modules with 8 ports (only shielded version)
Equipment	1 CCS 24-port patch panel preloaded with 24 CAT 5E CCS shielded or unshielded RJ45 jacks; labels-holder with transparent window (UTP) or preprinted window (STP) for the customized numbering; support and ties for cable fixing
Dimensions	19", 1 Unit
Colour	Black

Performance

Compliance	Category 5E - Class D
Approvals	ISO/IEC 11801-1/2:2017 EN 50173-1/2:2018 ANSI/TIA-568.2-D IEEE 802.3af
Warranty	15 years on the CCS system

Code	Description	Packaging
2002023	CCS 24-port patch panel with 24 Cat.5E shielded RJ45 jacks-IDC 110 system	1
2002021	CCS 24-port patch panel with 24 Cat.5E unshielded RJ45 jacks-IDC 110 system	1

110 cabling system

Category 6

110 CABLING SYSTEM

Patch Panel

Description

CAT6 CCS 24-port patch panel, preloaded with 24 unshielded RJ45 jacks with IDC 110 termination system for transmission channels of Class E.
Characteristics meet and exceed CAT 6 – Class E requirements up to 250MHz according to the ISO/IEC 11801 and ANSI/TIA 568.2-D standards.
They support Gigabit Ethernet (IEEE 802.3ab) applications and are suitable for PoE/PoE+/PoE++.

General characteristics

Structure	PC+ABS frame
Equipment	1 CCS 24-port patch panel preloaded with 24 CAT 56 CCS unshielded RJ45 jacks; labels-holder with transparent window for the customized numbering; rear metal support and ties for cable fixing
Dimensions	19", 1 Unit
Colour	Black

Performance

Certifications	UL 1863 Communications Circuit Accessories
Standards	ISO/IEC 11801-1/2:2017 EN 50173-1/2:2018; ANSI/TIA-568.2-D IEC 60512-99-002:2019

Code	Description	Packaging
2002027	CCS 24-port patch panel with 24 Cat.6 unshielded RJ45 jacks	1

110 cabling system

Voice system

IDC Voice patch panel – 25 ports

Description

CAT 3 CCS 25-port voice patch panel, preloaded with 25 unshielded 4-pin RJ45 jacks with IDC 110 termination system.

Characteristics

Structure	Steel frame, 25 ports modularity, 5 modules with 5 ports each, rear cable management
Jacks	25 pre-installed CAT 3 4-pin RJ45 unshielded jacks with IDC 110 termination system
Dimensions	19", 1U
Colour	Black

Performances

Standards	ISO/IEC 11801-1/2:2017 EN 50173-1:2018 ANSI/TIA-568.2-D

Code	Description
2002028	IDC Voice patch panel – 25 RJ45 ports

IDC Voice patch panel – 50 ports

Description

CAT 3 CCS 50-port voice patch panel, preloaded with 50 unshielded 6-pin RJ45 jacks with IDC 110 termination system.

Characteristics

Structure	Steel frame, 50 ports modularity, 5 modules with 10 ports each, rear cable management
Jacks	50 pre-installed CAT 3 6-pin RJ45 unshielded jacks with IDC 110 termination system
Dimensions	19", 1U
Colour	Black

Performances

Standards	ISO/IEC 11801-1/2:2017 EN 50173-1:2018 ANSI/TIA-568.2-D

Code	Description
2002029	IDC voice patch panel - 50 RJ45 ports

110 cabling system

Accessories

2-pair telephone patch cord

Description

CCS telephone RJ45-RJ45 unshielded patch cord, with blue cable and interchangeable colored clips.

Characteristics

Plug type	RJ45 plug (2 pairs)
Contacts	Phosphor bronze alloy plated with 50µm of gold
Cable	U/UTP, unshielded 2-pair cable (100 Ohm), AWG 24/7 flex bare copper conductors
Jacket	PVC
Colour	Blue
Length	2 mt

Performances

Standards	ISO/IEC 11801-1/2:2017 EN 50173-1:2018 ANSI/TIA-568.2-D
-----------	---

Code	Description
2005010	RJ45-RJ45 2 pair UTP telephone patch cord - 2 mt

Impact tool

Description

Tool to connect twisted pair cable on terminals type 110. Allows the simultaneous insertion of the conductor and the cutting of the excess part.

Are also available as accessories the base finger guard (cod. 2004011) that allows the positioning of the RJ45 sockets for easy termination of the same and a spare blade (cod 2004015).

Characteristics

Material	Thermoplastic flame retardant material with high mechanical resistance
Application	Connection of wires on 110 terminals
Mechanical features	Wheel for the regulation of impact pressure
Color	Yellow

Code	Description
2004018	Impact tool for IDC 110 termination system

Patch cords and plugs

Category 5E

Patch cords

Description

CAT 5E CCS RJ45-RJ45 shielded or unshielded patch cord, with interchangeable coloured clips.
Characteristics meet and exceed CAT 5E - Class D requirements up to 100 Mhz according to ANSI/TIA 568.2-D and ISO/IEC 11801.
Ideal for Gigabit Ethernet (IEEE 802.3ab) applications.

Performance

Compliance	CAT 5E – Class D
Approvals	ISO/IEC 11801-1/2:2017 EN 50173-1/2:2018 ANSI/TIA 568.2-D

General characteristics

Material	U/UTP or F/UTP cable shielded with AL/PET tape, 100 Ohm, 4 balanced pairs, AWG 24/7 (UTP version) or AWG26/7 (FTP version) bare copper flexible conductors; PVC outer jacket; RJ45 plug with 8 nickel bronze contacts plated with 50 µm hard gold
Connection	Thermo-sealed protection cap; insulation displacement according to IEC 60352-4; T568B wiring diagram; grey, blue, red, interchangeable clips for easy application identification
Applications	Permanent connections between active transmission equipments and patch panels; interconnections between panels
Packaging	Every patch cord is individually packed
Colour	Blue RAL 5015, Grey RAL 7032 or Red RAL 3001 for the unshielded version Grey RAL 7032 for the shielded version

Patch cords and plugs

Plugs

Category 5E

Description

CCS shielded or unshielded 8-pole plug to create patch cords. Characteristics meet and exceed CAT 5E - Class D requirements according to ISO/IEC 11801 and ANSI/TIA-568.2-D.

Characteristics

Material	Flame retardant thermoplastic material, with metal shell only for the shielded version
Contacts	8 nickel bronze contacts plated with 50 µm hard gold
Installation	On cables with flexible conductors
Packaging	Box 50 pcs

Performance

Compliance	Category 5E
Approvals	ISO/IEC 11801-1/2:2017 EN 50173-1/2:2018 ANSI/TIA-568.2-D

Code	Description
2012001	Cat 5E unshielded 8-pole RJ45 plug-UTP
2012002	Cat 5E shielded 8-pole RJ45 plug-STP

Category 6

Description

CCS shielded or unshielded 8-pole plug with pre-insert used to create patch cords. Characteristics meet and exceed CAT 6 - Class E requirements according to ISO/IEC 11801 and ANSI/TIA-568.2-D.

Characteristics

Material	Flame retardant thermoplastic material, with metal shell only for the shielded version
Contacts	8 nickel bronze contacts plated with 50 µm hard gold
Installation	On cables with flexible conductors
Packaging	Box 50 pcs

Performance

Compliance	Category 6
Approvals	ISO/IEC 11801-1/2:2017 EN 50173-1/2:2018 ANSI/TIA-568.2-D

Code	Description
2012005	Cat 6 unshielded 8-pole RJ45 plug-UTP
2012006	Cat 6 shielded 8-pole RJ45 plug-STP

Patch cords and plugs

Accessories

Boots for RJ45 plugs

Description

Coloured boots used to protect the plugs termination against the flexion and useful for the identification of the patch cord type. Available in different colours for a fast and easy identification of the cables.

Characteristics

Material	High flex thermoplastic material
Diameter	6,5 mm
Color	Blue, yellow, red, grey
Packaging	100 pcs

Code	Description
2012011	Boot for plug - Grey
2012012	Boot for plug - Blue
2012013	Boot for plug - Red
2012014	Boot for plug - Yellow

Crimping tools

Description

8-position crimping tools for RJ45 plug suitable for Cat.5E and Cat.6 RJ45 plugs to be installed on flexible cables.

Characteristics

Material	Burnished steel body, ergonomic handles made of thermoplastic material
Application	RJ45 plug crimping
Mechanism	Spring pressure system
Colour	Body: black Handles: red or black according to the model

Code	Description
2040086	8-position crimping tool for RJ45 plug
2040153	8-position professional crimping tool for RJ45 plug

Work outlet

All jacks of the CCS® cabling system are compatible with the Keystone standard to guarantee the integration in the vast majority of boxes and conduits produced by different manufacturers.

The range offered in the catalogue includes adapters for the most common civil series, 503 standard self-supporting faceplates, German, French and British type faceplates and 1 or 2-port wall mount boxes.

Faceplates and modules	p. 70
Multimedia box and Accessories	p. 74
Adapters	p. 75
Isolator	p. 76

503 type faceplates

Description

2, 3, 4-port 503 type self supporting faceplates compatible with Keystone standard for CAT 5E, 6, 6A CCS shielded and unshielded jacks.

Available blind inserts for faceplates.

General characteristics

Structure	Flame retardant thermoplastic material with high mechanical resistance; identification label with clear plastic holder
Connection	Compatible with 503 type Keystone standard
Installation	On recessed box or wall
Colour	White
Accessories	Blind insert in FR thermoplastic material colour white
Compatibility	With the 3-port faceplate use only the Easy Crimp Compact jacks

Code	Description	Packaging
2004012	Self supporting 503 type 2-position faceplate	1 pc
2004013	Self supporting 503 type 3-position faceplate	1 pc
2004014	Self supporting 503 type 4-position faceplate	1 pc
2003005	Blind insert	1 pc

Wall mount boxes

Description

1 and 2-port wall mount boxes for CCS keystone standard jacks with label-holder windows

General characteristics

Structure	Thermoplastic material
Slot	1 or 2 blank ports for CCS keystone standard jacks
Installation	Wall mount
Colour	White

Code	Description	Packaging
2004043	1-port blank wall mount box	1 pc
2004044	2-port blank wall mount box	1 pc

Work outlet

Faceplates and modules

German type faceplate

Characteristics

- Thermoplastic material, white colour
- 1 or 2-position blank module for CCS Easy Crimp jacks
- 80x80 mm frame
- Label-holder window
- Installation on recessed box

Code	Description
2004155	1-port CCS German type self-supporting faceplate 80x80mm
2004062	2-port CCS German type self-supporting faceplate 80x80mm

French type angled module 45x45 mm

Characteristics

- Thermoplastic material, white colour
- 1 or 2-position angled module for CCS jacks compatible with Keystone standard, 45x45 mm
- Label-holder window
- Installation on built-in box or wall

Code	Description
2004157	1-angled port CCS French type module 45x45mm
2004156	2-angled port CCS French type module 45x45mm

French type blank module 45x45 mm

Characteristics

- Thermoplastic material, white colour
- 1-position blank module for CCS jacks compatible with Keystone standard, 45x45 mm with sash window
- Label-holder window
- Installation on recessed box

Code	Description
2004059	CCS French type blank module with sash window 45x45mm

French type faceplate

Characteristics

- Thermoplastic material, white colour
- Faceplate with 2-position blank module for CCS jacks compatible with Keystone standard, 45x45 mm with sash window
- Label-holder window
- Installation on recessed box

Code	Description
2004042	2-port CCS French type self-supply-faceplate 45x45mm with module

Work outlet

Faceplates and modules

British type faceplates

Description

1 and 2-port CCS self supporting bevelled faceplates for angle or standard British type modules.

General characteristics

Structure	UV-stabilized ABS material with high mechanical resistance; bevelled.
Dimensions	1 port. 50x50 mm 2 port. 50x100 mm
Distance betw. screws	1 port 60 mm 2 port 121,60 mm
Installation	On recessed box or wall
Colour	white
Accessories	½ blank module ½ angle keystone adapter

Code	Description
2004151	1-port CCS British type bevelled faceplate 50x50mm
2004153	1/2 blank module for CCS British type faceplates
2004152	2-port CCS British type bevelled faceplate 50x100mm
2004154	1/2 angle keystone adapter for CCS UTP/STP jacks

Modules for British type faceplates

Description

CCS CAT5E and CAT6 unshielded jacks with IDC 110/KRONE termination system for transmission channels of Class D (CAT5E) and Class E (CAT6). Suitable for the installation on CCS British type faceplates.

General characteristics

Structure	UV-stabilized ABS and polycarbonate material with high mechanical resistance; RJ45 jack contacts in phosphor bronze plated with 50µm hard gold.
Connections	IDC 110/KRONE termination system
Installation	On British type faceplates
Colour	white

Code	Description
2002019	CCS Cat6 RJ45 UTP jack-110 IDC- for British faceplates
2002014	CCS Cat5E RJ45 UTP jack-110 IDC- for British faceplates

Multimedia box

Description

Wall mount multimedia box that can contain up to 3 modules (to be ordered separately) for the copper and fiber optic link connections.

General characteristics

Structure	Flame retardand thermoplastic material with high mechanical resistance; label holder window for jacks identification, coloured icons
Dimensions	W180xD150xH35 mm
Installation	Wall mount
Colour	White

Code	Description
2004070	Wall mount multimedia box

Modules for multimedia box

Description

Modules for multimedia box.
They are available in different versions for the connection to both copper and fiber systems.

General characteristics

Structure	Thermoplastic with high mechanical resistance
Types	2-position module for Keystone jacks 2 ST MM adapters 1 SC Duplex MM adapter 1 blind module
Installation	On multimedia boxes
Colour	White

Code	Description
2004074	2-port blank module, Keystone standard
2004071	Module with 2 ST-ST adapters
2004072	Module with 1 SC-Duplex adapter
2004073	Blind module for multimedia box

Civil series adapters for RJ45 jacks

Description

Adapter for the installation of CCS® RJ45 jacks on civil series frames.

Adapters for BTicino frames

Code	Description
2004026	Adapter - Magic series
2004027	Adapter - Living series
2004028	Adapter - Living International series
2004029	Adapter - Living Light series
2004034	Adapter - Living Light Tech series
2004036	Adapter - Magic TT series (Ivory)
2004037	Adapter - Matix series (White)
2004057	Adapter - Axolute series (Anthracite)

2004063	Adapter - Arkè series (Black)
2004102	Adapter - Arkè series (Metal)

Adapters for ABB frames

Code	Description
2004099	Adapter - Elos series (Black)
2004093	Adapter - Chiara series (White)
2004084	Adapter - Mylos series (White)
2004100	Adapter - Mylos series (Black)

Network Isolator

Description

A network isolator is a device that can ensure electrical separation in LAN networks: it disconnects all electrically conductive connections between network peripherals and the connected device by providing protection against voltages up to 4 kV and higher. At the same time, it makes it possible to transmit data signals with extremely low losses in accordance with Cat. 6A/Class EA performance.

This type of isolators are used especially in the medical sector to reduce the risk of potential electrical injury to operators or patients and limit the extent of lightning damage. An adapter for DIN rail installation is provided as accessory.

Performances

Standards	ISO/IEC 11801 IEC 60601-1-2 IEC 60100-3-2/3 ANSI/AAMI ES60601-1 EN 60529
-----------	--

Characteristics

Structure	Plastic outer frame
Input interface	1 RJ45 port
Output interface	1 RJ45 port
Performance	For shielded Class EA/Cat. 6A transmission channels
Dielectric strenght	6kV in AC; 8,5kV in DC
Working voltage	3000 VAC
Insulation section	2 MOPP
Temperature range	Da -10° C a +70° C
Protection rating	IP40

Code	Description	Packaging
2004004	Network isolator	1 pc

Industrial System

The use of Ethernet system in industrial environments asks for the use of specific cabling components, especially designed for use in demanding environments: industrial, chemical, food and military industries. CCS® offers a brand-new system of connection, termination and coupling in harsh conditions.

IP68 housing for RJ45 plugs

Description

IP68 housing to terminate LAN cables with RJ45 Easy Crimp plugs in demanding environments.
It can be used in association with the IP68 receptacle P/N 2050243 or with the IP68 housing protection for RJ45 Easy Crimp Compact STP jacks P/N 2050211.

Characteristics

Material	Housing, cable gland and cover in PA66; sealings in silicone rubber
Protection degree	IP68
Colour	Black
Compatibility	RJ45 Easy Crimp plugs cat 6 and Cat 6 _A STP and UTP

Compatibility

P/N. 2012008 Plug EASY CRIMP Cat. 6 STP
P/N. 2012009 Plug EASY CRIMP Cat. 6_A STP

P/N 2012007 Plug EASY CRIMP Cat. 6 UTP

IP68 Cat. 6A STP in-line coupler

Description

CCS Easy Crimp IP68 in-line coupler Category 6A STP ideal to extend existing copper links in environments demanding for high protection degree.
Toolless termination system for an easy and quick termination. It complies with Cat 6A Class EA requirements, standards ISO/IEC 11801, EN 50173 and ANSI/TIA 568.2-D.

Performances

Compliance	Category 6A - Class EA
Standards	ISO/IEC 11801-1/2: 2017 EN 50173-1/2: 2018 ANSI/TIA-568.2-D IEC 60529

Characteristics

Material	IP68 base PA + GF; cable glands PA66; coupler in zinc-alloy nickel plated; wire manager in PC-FR UL94 V0; IDC terminals in phosphor bronze tin plated
Connection	IDC insulation displacement for solid copper conductors 22-26 AWG; double label indicating T568A/B connection scheme
Installation	On solid cables
Retermination	5 times
Protection degree	IP68
Colour	Housing: black Coupler: metal grey
Cable OD	From 6 to 9 mm

Code	Description	Packaging
2050210	IP68 in-line coupler Easy Crimp cat. 6A STP shielded	1 pc

Easy Crimp CAT 6 STP

Description

CCS Easy Crimp shielded plug used to connect cables with solid and flexible conductors.

With the toolless Easy Crimp system, the connection is always fast and performing.

Ideal for the realization of modular plug terminated link (MPTL), "transition point" or patch cords out of the standard lengths.

Characteristics meet and exceed Cat.6 - Class E requirements according to ISO/IEC 11801 and ANSI/TIA 568.2-D.

Suitable for PoE/PoE+/PoE++ applications..

General characteristics

Material	Plug housing in zinc alloy with high mechanical resistance; 8 nickel bronze contacts plated with 50 µm hard gold
Connection	IDC insulation displacement for solid conductors 22-26 AWG and flexible conductors 22-27 AWG; double labelling colour scheme indicating the two T568A/B connections
Installation	On cables with solid and flexible conductors
Compatible cable diameter	From 6 to 9 mm

Performance

Compliance	UL 1863 Communications-Circuit Accessories
Standards	ISO/IEC 11801-1/2:2017 EN 50173-1/2:2018; ANSI/TIA-568.2-D IEC 60603-7-5 IEC 60512-99-002:2019

Easy Crimp CAT 6_A STP

Description

CCS Easy Crimp shielded plug used to connect cables with solid and flexible conductors.

With the toolless Easy Crimp system, the connection is always fast and performing.

Suitable for the realization of the modular plug terminated link (MPTL), "transition point" or patch cords out of the standard lengths.

Characteristics meet and exceed Cat.6_A - Class E_A requirements according to ISO/IEC 11801 and ANSI/TIA-568.2-D

Suitable for PoE/PoE+/PoE++ applications

General characteristics

Material	Plug housing in zinc alloy with high mechanical resistance; 8 nickel bronze contacts plated with 50 µm hard gold
Connection	IDC insulation displacement for solid conductors 22-26 AWG and flexible conductors 22-27 AWG; double labelling colour scheme indicating the two T568A/B connections
Installation	On cables with solid and flexible conductors
Compatible cable diameter	From 6 to 9 mm

Performance

Compliance	UL 1863 Communications-Circuit Accessories
Standards	ISO/IEC 11801-1/2:2017 EN 50173-1/2:2018; ANSI/TIA-568.2-D IEC 60603-7-51 IEC 60512-99-002:2019

Code	Description	Packaging
2012009	CAT6A STP Easy Crimp field plug	1 pc

Easy Crimp Compact CAT 6_A STP

Description

CCS Easy Crimp Compact Cat. 6_A shielded RJ45 field plug used to terminate cables with solid or stranded conductors. Toolless plugs, no tool is needed for a quick and easy termination. Ideal for the realization of MPTL connections (Modular Plug Terminated Link) or patch cords of non-standard length. Characteristics meet and exceed Cat.6_A - Class E_A requirements according to ISO/IEC 11801 and ANSI/TIA-568.2-D Suitable for PoE/PoE+/PoE++ applications.

Characteristics

Material	Plug body in zinc alloy nickel plated, wire manager in flame retardant polycarbonate UL94 V0; 8 contacts phosphor bronze alloy plated with 50µm of gold; steel cable gland
Connection	IDC insulation displacement for solid conductors 22-26 AWG and stranded 23-27 AWG; label indicating T568A/B connection schemes
Installation	On cables with solid and stranded conductors
Cable OD	From 6 to 9 mm

Performance

Compliance	UL 1863 Communications-Circuit Accessories
Standards	ISO/IEC 11801-1/2:2017 EN 50173-1/2:2018; ANSI/TIA-568.2-D IEC 60603-7-51 IEC 60512-99-002:2019

DIN-rail adapters

DIN-Rail plastic adapter

Description

DIN-rail plastic adapter for 1 shielded or unshielded CCS keystone jack. Supplied with side-cover to grant high degree protection rating.

General characteristics

Structure	Plastic body, side-by-side mountable, with spring for grounding and side cover
Connection	Compatible with RJ45 keystone jacks
Installation	On 35 mm DIN-Rail according to DIN EN60715
Colour	Grey
Ports	1

DIN-Rail metal adapters

Description

DIN-rail metal adapter for 1, 2 or 3 CCS Keystone shielded and unshielded RJ45 jacks

General characteristics

Structure	Metal body
Connection	Compatible with RJ45 keystone shielded and unshielded jacks
Installation	On 35mm DIN-Rail according to DIN EN60715
Colour	Metal
Ports	1, 2 and 3-port

Code	Description
2050246	CCS DIN-Rail 1-port plastic adapter

Code	Description

2050248	CCS DIN-Rail 2-port metal adapter
2050249	CCS DIN-Rail 3-port metal adapter

Fiber optic cabling system

Used for the realization of long and short distance connections, the components of optical cabling system allow to realize high speed transmission channels while providing at the same time minimum space take up and maximum immunity to electromagnetic interferences.

CCS® offers a complete range of products including optical cables, connectors, trays, termination kits or solutions ready for installation (pre-terminated optical cables).

<i>FO cables</i>	<i>p. 87</i>
<i>Pre-terminated FO cables</i>	<i>p. 93</i>
<i>FO cabling system</i>	<i>p. 97</i>
<i>Fiber optic termination</i>	<i>p. 117</i>
<i>Fiber To The Home</i>	<i>p. 123</i>

FO cables

The main component for optical cabling systems is the cable. In order to choose the right cable, it is fundamental to consider the constructive characteristics, the type of fiber used, the distance to be covered, the requested application and the type of laying.

In this section you will find a wide selection of products depending on the environment of installation (indoor, indoor/outdoor, outdoor), on the type of armouring (with metallic armour and/or with dielectric anti-rodent armour) and on their reaction to fire.

U-DQ(BN)H / I-B(ZN)BH Loose monotube LSZH Jacket

Loose fiber optic cables with LSZH (Low Smoke Zero Halogen) outer jacket, 250µm primary coating of the fiber, dielectric anti-rodent protection. In the U-DQ-(BN)H version fibers are kept together inside a single thermoplastic tube and filled with a water-blocking gel to prevent moisture penetration while version I-B(ZN)BH is dry core type with loose tube without gel.

Applications and performance

Cables U-DQ-(BN)H type are suitable for indoor and outdoor use, while cables I-B(ZN)BH, in Euroclass B2ca, are suitable only for indoor installation according to EN 50173, ISO/IEC 11801. Depending on the type of fiber and on the length of the link, they are suitable for the realization of transmission channels up to and exceeding 10GbE. Ideal for laying in dry pipes or ducts for the realization of backbones connecting cabinets of the same building or located in different buildings.

Certifications and approvals

Data transmission FO cables according to IEC 60793 and IEC 60794-1-2.

U-DQ(BN)(SA)H Loose Monotube - metallic armour - LSZH jacket

IEC 60794-1-2
IEC 60793

Loose fiber optic cable with corrugated steel tube metallic armour, LSZH (Low Smoke Zero Halogen) outer jacket, 250µm fiber primary coating, longitudinal and transverse water-penetration resistant. The corrugated steel tube armour offers a high mechanical protection against rodents and compressive stresses. Optical fibers are kept together inside a thermoplastic tube and filled with water-blocking gel to prevent moisture penetration.

Application and performance

Cable suitable for the realization of cabling systems for indoor and outdoor use according to EN 50173, ISO / IEC 11801 norms. Depending on the type of fiber and on the length of the link, they are suitable for the realization of transmission channels up to and exceeding 10GbE. Ideal for laying in pipes or ducts for the realization of backbones connecting cabinets of the same building or located in different buildings.

Certifications and approvals

Data transmission FO cables according to IEC 60793 and IEC 60794-1-2.

A-DQ(BN)2Y Loose Monotube PE Jacket

IEC 60794-1-2
IEC 60793

Light and flexible non-metallic loose fiber optic cables with high mechanical resistance: dielectric armour, PE (Polyethylene) outer jacket, 250µm fiber primary coating, longitudinal water-penetration resistant and dielectric anti-rodent protection. Optical fibers are kept together inside a thermoplastic tube and filled with a water-blocking gel to prevent moisture penetration.

Application and performance

Cable suitable for the installation of cabling systems for outdoor use according to EN50173, ISO/IEC 11801 norms. Depending on the type of fiber and on the length of the link, they are suitable for the realization of transmission channels up to and exceeding 10GbE. Ideal for laying in pipes or ducts for the realization of outdoor backbones connecting different buildings.

Certifications and approvals

A-DQ(BN)(SR)2Y Loose Monotube metallic armour PE jacket

IEC 60794-1-2
IEC 60793

Loose fiber optic cable, with corrugated steel tape metallic armour, PE (Polyethylene) outer jacket, 250µm fiber primary coating, longitudinal and transverse water-penetration resistant. The corrugated steel armour offers a high mechanical protection against rodents and compressive stresses. Optical fibers are kept together inside a thermoplastic tube filled with water-blocking gel to prevent moisture penetration.

Application and performance

Cable suitable for the realization of cabling systems for outdoor use according to EN 50173, ISO/IEC 11801 norms. Depending on the type of fiber and on the length of the link, they are suitable for the realization of transmission channels up to and exceeding 10GbE. Ideal for laying in pipes or ducts for the realization of outdoor backbones connecting buildings in locations where a good water and rodent resistance is needed.

Certifications and approvals

Data transmission FO cables according to IEC 60793 and IEC 60794-1-2.

Construction characteristics

Pre-terminated FO cables

CCS® offers pre-terminated fiber optic cables tested and certified in laboratory in the required length. Available with dielectric or metallic armour, Single-Mode or Multimode, OM1 to OM4, the cables are terminated with ST, SC or LC connectors at both ends.

Pre-terminated FO cables	p. 94
Indoor/outdoor use	p. 95
Outdoor use	p. 96

Pre-terminated FO cables

Pre-terminated FO cables

How to order

1. Choose the cable to use among the available ones at pages 95 and 96
2. Specify in the order the required length by considering the spair quantity to store inside the rack plus one additional meter, at both ends of the cable, necessary for the termination
3. On the base of the number of fibers and cable type, choose the desired assembly and indicate in your order the corresponding code (1 pc for each length)

Pre-terminated FO cable

Description

Pre-terminated fiber optic loose cable assemblies with LSZH outer jacket for indoor/outdoor use or with PE outer jacket and and metallic armour for outdoor use only.

Assemblies with ST, SC, LC connectors are available; special connectors can be supplied upon request. The termination kit includes :

- Full fibers termination on both ends
- Optical connectors
- Splitter kit for the separation and protection of fibers
- Protection of the fastened-to-heads connectors with a special corrugated tube, reinforced with thermoplastic material, with 32 mm diameter and 70 cm long
- Test report and certification attached to the package

During installation we recommend to follow the instructions attached to the package. The cable duct must have a diameter of 50 mm at least.

Terminations protection kit

Description and guidelines

01. Release the two screws on the protection tube and then the splitter kit
02. Carefully pull out the protection tube while maintaining the protection kit downwards and avoid producing any torsion on the terminations
03. Protection system metal tip
04. Hole to fix the tow-system, max. pull strength 100N

Pre-terminated FO cables

Indoor/outdoor use

The colour of the jacket in the picture is purely informational

U-DQ(ZN)BH / I-B(ZN)BH Loose monotube LSZH jacket

Universal Loose cables to be pre-terminated, with LSZH (Low Smoke Zero Halogen) outer jacket, 250µm primary coating of the fiber, dielectric anti-rodent protection. In the U-DQ-(ZN)BH version fibers are kept together inside a single thermoplastic tube and filled with a water-blocking gel to prevent moisture penetration while version I-B(ZN)BH is dry core type with loose tube without gel.

Applications and performance

Cables U-DQ-(ZN)BH type, in Euroclass Dca, are suitable for indoor and outdoor use, while cables I-B(ZN)BH, in Euroclass B2ca, are suitable only for indoor installation according to EN 50173, ISO/IEC 11801. Depending on the type of fiber and on the length of the link, they are suitable for the realization of transmission channels up to and exceeding 10GbE. Ideal for laying in dry pipes or ducts for the realization of backbones connecting cabinets of the same building or located in different buildings.

Certifications and approvals

Data transmission FO cables according to IEC 60793 and IEC 60794-1-2.

PRE-TERMINATED

Pre-terminated FO cables

Outdoor use

The colour of the jacket in the picture is purely informational

A-DQ(ZN)(SA)2Y Loose monotube with metallic armour and PE jacket

IEC 60794-1-2
IEC 60793

Outdoor Loose cable to be pre-terminated, with corrugated steel tape metallic armour, PE (polyethylene) outer jacket, 250 µm primary coating of the fiber, longitudinal and transverse water-penetration resistant. The corrugated steel tape offers a safer and more effective mechanical protection against rodents and compressive stresses. Optical fibers are kept together inside a thermoplastic tube filled with water-blocking gel to prevent moisture penetration.

Applications and performance

Cable suitable for the realization of cabling systems for outdoor use according to EN 50173, ISO/IEC 11801 norms. Depending on the type of fiber and on the length of the link, they are suitable for the realization of transmission channels up to and exceeding 10GbE. Ideal for laying in pipes or ducts for the realization of outdoor backbones connecting buildings in environments where a high water resistance is required.

Certifications and approvals

Data transmission FO cables according to IEC 60793 and IEC 60794-1-2.

Construction characteristics

Cable core	Loose tube with fibers immersed in water-blocking gel
Filler protection	Glass yarns
Outer jacket material	PE
Armour	Corrugated steel tape
Core diameter	From 2,8 to 3,5 mm
Outer diameter	8,5 mm
Weight	From 75 to 80 kg/km

Mechanical and environmental properties

Use	Outdoor
Bend. radius during installation	15 x outer diameter
Bend. radius after installation	10 x outer diameter
Max. pulling strength	1000 N
Crush test	2000 N/dm
Installation temperature	From -40°C to +70°C
Operating temperature	From -40°C to +70°C

FO cabling system

CCS® offers a full range of products designed to offer high quality solutions and to satisfy all needs in the FO installations. Optical patch panels and enclosures, adapters, pigtails and patch cords are some of the articles included in our portfolio.

CCS® system includes products for the use of single-mode and multimode optical fibers OM1, OM2, OM3 and OM4 versions.

Fiber optic cabling system

Modular patch panel

Modular fiber optic patch panel 4U

Description

Modular fiber optic patch panel 4U, suitable for the splicing and connection of fiber optic cables into 19" racks. It consists of a 3U frame with front opening , which hosts up to 12 optical modules to manage up to 288 fibers, and a 1U pullout tray, equipped with 5 front rings for the horizontal cable management and with 12 pre-sheared rear PG16 holes for the cable inlet. The patch panel can be fitted with different optical modules according to the specific needs, listed at page 87.

Reference standards

IEC 60297
DIN 41494

General characteristics

Installation	On 19" racks; front mounting on uprights
Structure	Zinc-plated aluminum sheet frame with front opening, 3U; pullout tray 1U with 5 front plastic rings and with 12 rear PG16 holes.
Max.No. of modules	12
Max. No. of fibers	288
Units	4 Units
Dimensions	W483xD300xH177 mm
Colour	Frame : Grey Cable management rings: Black

Code	Description	Packaging
2006080	19" modular FO patch panel 4U	1 pc

Fiber optic cabling system

Optical modules

Optical modules for patch panel 4U

Description

Fiber optic termination modules fit for the installation in the modular fiber optic patch panel 4U.

The modules are made of a 6 or 12-port front panel with adapters, a plastic body with an integrated system for the management of pigtails and optical fibers and they are equipped with a splice tray with organizer to protect the splices.

Models available are with 6/12 LC Duplex adapters or 12 SC Simplex adapters and they also include pigtails.

Compatible fiber optic cables: multimode 50/125 OM3 and OM4 and single-mode 9/125.

General characteristics

Installation	On modular fiber optic patch panel 4U
Structure	6 or 12-port front panel with adapters and pigtails, plastic body UL94V-O with an integrated system for the management of pigtails and optical fibers; plastic splice tray UL94V-O equipped with organizer, cover and holder to fix the fiber optic cable.
Models	6 LC Duplex adapters with 12 LC pigtails 12 SC Simplex adapters with 12 SC pigtails 12 LC Duplex adapters with 24 LC pigtails
Type of fibers	50/125 OM3-OM4, 9/125 OS2
Dimensions	W35xD268xH129 mm

Fiber optic patch panels 24-port SC Simplex and 12/24-port SC Duplex

Description

12 or 24-blank port sliding fiber optic patch panels, suitable for the splicing and connection of fiber optic cables into 19" racks. They are equipped with a pullout tray with cable guide and slotted holes connected to the cable inlet system, thus making installation much easier. Fast opening and closing of the tray is ensured by two frontal fastening rivets. The mounting brackets, adjustable in depth, allow the installation of the patch panel also into racks of reduced depth.

Supplied with caps, cable glands and ties for managing and fastening of the optical fibers.

Reference standards

IEC 60297
DIN 41494

General characteristics

Installation	On 19" racks with minimum depth of 420mm; front mounting on uprights
Structure	Varnished sheet steel frame; pullout tray with 12 or 24 ports according to the model; 4 rear cable inlets; 2 semicircular cable management plastic guides; mounting brackets adjustable in depth
Ports	12/24 blank ports for SC Duplex adapters 24 blank ports for SC Simplex or LC Duplex adapters
Equipment	2 cable glands for securing the optical cables; ties for cabling management; caps for port closing; screws kit for adapters (only for codes 2006005/2006006)
Units	1 Unit
Dimensions	W482xD210xH44,5 mm
Colour	Black

Fiber optic cabling system

Wall mount enclosures

IP65 MDU box

Description

IP 65 MDU box for multi-fiber building systems for the distribution of the antenna and satellite optical signals or internet connectivity through wireless systems. Both for indoor and outdoor installations, on wall or pole, it is designed for FTTH and FTTB systems for cable-to-cable in line splices and terminations through pigtailed or connectors.

Characteristics

Installation	Wall or pole
Structure	Sturdy structure with ABS body, 180°C opening door, lockable with safety key, 2 cable inlets with glands, 12 cable inlets for drop cables or Simplex patch cords, integrated splice tray for 24 splices and over length fibre storage.
No. of ports	12 or 24 for SC Simplex or LC Duplex adapters
Dimensions	W250xD215xH75 mm
Protection degree	IP65

Reference standard

EN 60529

24-port wall mount fiber optic enclosure for ST and SC adapters

Description

24-blank port wall mount enclosures for ST and SC Simplex adapters with two separated sections: one for hosting cables and splice trays with top and bottom cables inlet; the other for patch cords management and cabling maintenance.

Characteristics

Installation	Wall mount
Structure	Varnished sheet steel frame divided into two sections; 24 ports compatible with ST and SC adapters; holder for fixing splice trays; key lock
No. of ports	24 for SC Simplex or ST adapters
Dimensions	W365xD105xH318 mm
Protection degree	IP20
Colour	Grey RAL 7035

Reference standard

EN 60529

Code	Description
2006030	12-port MDU box - blank
2006032	24-port MDU box - blank

Code	Description
2006015	24-port blank wall mount FO enclosure for SC adapters
2006016	24-port blank wall mount FO enclosure for ST adapters

Fiber optic cabling system

DIN-rail optical boxes

4/6-port DIN-rail boxes

Description

Optical boxes for industrial applications.
Suitable for the installation on DIN-rails, they host up to 12 optical fibres.
Equipped with integrated splice trays organizer, they are available in three models:
4-blank port for ST adapters
6-blank port for SC Duplex adapters
6-blank port for SC Simplex adapters

Performance

IEC 60529

General characteristics

Installation	On DIN-rail
Structure	Varnished steel frame; 4 or 6-blank port front panel fit for ST or SC adapters; integrated splice trays organizer, cable inlet through 2 dedicated holes for PG11 cable glands
Max. No. of managed fibres	12
Dimensions	W125xD35xH136 mm
Protection degree	IP20
Colour	Grey RAL 7035

Code	Description	Packaging
2006071	6-port DIN rail optical box for 6 SC Duplex adapters	1 pc
2006072	6-port DIN rail optical box for 6 SC Simplex adapters	1 pc
2006073	4-port DIN rail optical box for 4 ST adapters	1 pc

2007084	Blinding insert SC Duplex	1 pc

Fiber optic cabling system

Multimedia box and Accessories

Multimedia box

Description

Wall mount multimedia box that can contain up to 3 modules (to be ordered separately) for the copper and fiber optic link connections.

General characteristics

Structure	Flame retardand thermoplastic material with high mechanical resistance; label holder window for jacks identification, coloured icons
Dimensions	W180xD150xH35 mm
Installation	Wall mount
Colour	White

Code	Description
2004070	Wall mount multimedia box

Modules for multimedia box

Description

Modules for multimedia box.
They are available in different versions for the connection to both copper and fiber systems.

General characteristics

Structure	Thermoplastic with high mechanical resistance
Types	2-position module for Keystone jacks 2 ST MM adapters 1 SC Duplex MM adapter 1 blind module
Installation	On multimedia boxes
Colour	White

Code	Description
2004074	2-port blank module, Keystone standard
2004071	Module with 2 ST-ST adapters
2004072	Module with 1 SC-Duplex adapter
2004073	Blind module for multimedia box

Fiber optic cabling system

Keystone adapters

SC-SC single-mode adapters

Characteristics

- SC/SC Simplex connection
- For single-mode fibers
- Keystone snap-in
- Installation on multimedia boxes, faceplates or CCS empty panels

Code
2004089
Description
SC-SC Keystone adapter for single-mode fiber

SC-SC multimode adapters

Characteristics

- SC/SC Simplex connection
- For multimode fibers
- Keystone snap-in
- Installation on multimedia boxes, faceplates or CCS empty panels

Code

Description
SC-SC Keystone adapter for multimode fiber

LC-LC Duplex single-mode adapters

Characteristics

- LC/LC Duplex connection
- For single-mode fibers
- Keystone snap-in
- Installation on multimedia boxes, faceplates or CCS empty panels

Code
2004091
Description
LC-LC Duplex Keystone adapter for single-mode fiber

LC-LC Duplex multimode adapters

Characteristics

- LC/LC Duplex connection
- For multimode fibers
- Keystone snap-in
- Installation on multimedia boxes, faceplates or CCS empty panels

Code
2004090
Description
LC-LC Duplex Keystone adapter for multimode fiber

Fiber optic cabling system

Adapters

Adapters for single-mode and multimode fibers

Description

Simplex or duplex adapters for coupling single-mode or multimode connectors inside fiber optic patch panels or boxes.

Reference standard

ANSI/TIA 568.3-D
IEC 61754
IEC 60874

Characteristics

Material	Thermoplastic or metal structure (for ST adapters), phosphor bronze sleeve or Zirconia for ST adapters.
Connection	ST, SC, SC Duplex or LC Duplex
Installation	On fiber optic patch panel or box
Fiber	Single-mode or multimode
Insertion loss	SM: typical 0,15 dB MM: typical 0,20 dB

Splice trays

Description

Modular and stackable splice trays with cover. Each tray has 2 organizers which can hold 6 splices each.

The following items are available:

- Base unit
- Additional unit
- Cover for splice tray

Characteristics

Installation	On enclosures or optical trays
Material	Thermoplastic with high mechanical resistance
Capacity	12 splices
Colour	White

Code	Description
2008195	12 FO splice tray
2008196	Additional 12 FO splice tray
2008193	Cover for splice trays

Protection tubes

Description

Reinforced heat shrink tubes, standard length 45 mm and 60 mm against crushing and bending.

Ideal to protect fusion splices.

Characteristics

Installation	On fusion splices
Material	Heat-shrink material reinforced with inner stainless steel protection
Lengths	45/60 mm
Outer diameter	2,5/3,5 mm
Colour	Transparent

Code	Description
2008191	Heat-shrink tubes: diam. 2,5-3,5mm , L 45mm
2008192	Heat-shrink tubes: diam. 2,5-3,5mm , L 60mm

Fiber optic cabling system

Pigtails

ST/SC/LC pigtails

Description

ST, SC and LC pigtails for the termination of single-mode and multimode optical fibers by electric arc fusion splicing. Pigtails with different types of connectors are available upon request.

Characteristics

Connection	ST, SC, LC, SC/APC
Cable type	Simplex semi-loose
Fiber type	Single mode or multimode
Insertion loss	SM: typical 0,15 dB MM: typical 0,20 dB
Length	2 mt
Packaging	Each pigtail is individually packed with test report included

Easy strip pigtails

SC/LC EasyStrip pigtails

Description

Set of 12 coloured SC and LC pigtails for the termination of single-mode and multimode 50/125 OM2, OM3 and OM4 optical fibers by electric arc fusion splicing.

Characteristics

Connection	LC-PC, SC-PC
Cable type	Easy strip
Fiber type	Single-mode 9/125 and Multimode 50/125 OM2, OM3, OM4
Insertion loss	$\leq 0,3$ dB
Length	2 mt
Installation	Optical patch panels or boxes
Packaging	12 pigtails in plastic bag

Bifiber patch cords

ST

SC

LC

Multimode 62,5/125 OM1

Description

Multimode 62,5/125 OM1 bifiber patch cords, terminated with suitable connectors at both ends.

Ideal for the connection between active equipments and patch panels.

Available from 1mt to 5mt standard length. Patch cords of different lengths can be supplied upon request.

Characteristics

Termination	ST/ST, SC/SC, ST/SC, ST/LC, SC/LC, LC/LC
Cable	Duplex Semi-Tight with LSZH (Low Smoke Zero Halogen) jacket
Fiber	Multimode 62,5/125 OM1
Insertion loss	0,3 dB
Operating temperature	From -20° C up to 60° C
Packaging	Every patch cord is individually packed
Cable colour	Orange

Reference standards

ISO/IEC 11801

EIA/TIA 568.3-D

IEC 61754; IEC 60874

Fiber optic cabling system

Closure

In-line splice closure UCAO MFT

Description

Splice closure suitable to contain up to 7 MFT splice trays.
The kit includes the necessary accessories to fix 2+2 cables in/out.
MFT trays (for 24 splices) are also available on demand.

Characteristics

Structure	Thermoplastic material resistant to chemical and atmospheric agents
Cables diam.	6-21 mm
Inlets	2+2
Max.tray count.	168 splices on MFT trays
Protection degree	IP68
Installation	Aerial, underground or direct burial
Colour	Black

Code	Description	Packaging
2007040	In-line splice closure UCAO MFT	1 pc

Fiber optic termination

CCS® Fiber optic product range includes tools for the termination of optical cables in the field.

The optical cable is connected to a pigtail with the same type of fiber and suitable connector through a fusion splicer. The choice of the fusion splicer grants minimal losses on the link.

Cleaning Accessories are also to be found in our range.

Fusion splicer	p. 118
Cleaver	p. 120
Cleaning Accessories	p. 121
Stripper, crimping tool	p. 122

Fiber optic termination

Fusion splicer

Clad alignment fusion splicer

Description

Fusion splicer, with adaptive clad alignment type V-Groove for the splicing of single-mode and multimode optical fibers or pigtails.
The ends of the two optical fibers to splice, after proper alignment, are spliced by ensuring absolute continuity of the optical wave guide.
Splicing is obtained by heating the fibers through an electric arc.

Reference standard

ISO/IEC 11801
ANSI/TIA 568.3-D

General characteristics

Splice method	Clad alignment with DAA (Digitalized Active Alignment) system
Typical Loss	From 0,01 to 0,04 dB
Return Loss	>60 dB
Suitable fiber types	SM (ITU G.652), MM (ITU G.651), DS (ITU G.653), NZDS (ITU G.655), ITU G.657A, ITU G.657B
Electrode lifespan	>5500 electric arcs
Splice time	10 seconds
Monitor	Colour LCD 4,3" with Touch Screen
Weight	1,39 kg (without battery)
Dimensions	122x124x138 mm
Operating environment	-20° +60°C, max. humidity 95%
Equipment	Splicer, cleaver, stripper, power cord, USB cable, cooling tray, 2 battery packs, spare electrodes, adapters for SOC connectors, CD manual, hand carrying case

Code	Description	Packaging
2040162	Clad Alignment fusion splicer Mini 4S+	1 pc

Fiber optic termination

Fusion splicer

Core alignment fusion splicer

Description

Fusion splicer, with core alignment type V-Groove for the splicing of single-mode and multimode optical fibers or pigtails. The ends of the two optical fibers to splice, after proper alignment, are spliced by ensuring absolute continuity of the optical wave guide. Splicing is obtained by heating the fibers through an electric arc. The splicer uses a DCID (Digitalized Core Image Detecting) system for the core alignment of the fibers, features a color touchscreen with tempered glass and it's compatible with SOC connectors.

Reference standard

ISO/IEC 11801
ANSI/TIA 568.3-D

General characteristics

Splice method	Core alignment DCID (Digitalized Core Image Detecting) system
Typical Loss	From 0,01 to 0,04 dB
Return Loss	>60 dB
Suitable fiber types	SM (ITU G.652 & G.657), MM (ITU G.651), DS (ITU G.653), NZDS (ITU G.655)
Electrode lifespan	>5500 electric arcs
Splice time	6/8 seconds
Monitor	Colour LCD 4,3" with Touch Screen
Weight	1,4 kg (without battery)
Dimensions	123x124x138 mm
Operating environment	-20° +60°C, max. humidity 95%
Equipment	Splicer, cleaver, stripper, power cord, USB cable, cooling tray, 2 battery packs, spare electrodes, adapters for SOC connectors, CD manual, hand carrying case
Connectivity	Mini-USB

Code	Description	Packaging

Fiber optic termination

Cleaver

Optical fibers cleaver for fusion splicer

Description

The Mini50GB is a high precision cleaver to be used with fusion splicers for cutting the optical fibers. The cleaver is equipped with an integrated system to place and fix the fibers, a diamond blade which allows 90° cuts with a maximum tolerance of 0,5° and a collector for the surpluses of the cut fibers.

Characteristics

FO cables	Optical fibers with 250 µm or 900 µm coating or with 2/3 mm diameter
Structure	Metal alloy with high mechanical resistance
Mechanical properties	Integrated holder for the fibers placing and fixing, sliding diamond blade, collector for cut fibers surplus
Cut angle	90± 0,5°
Cuts number	48000
Length of cut	8-20 mm
Dimensions	71x91x62 mm

Code	Description	Packaging
2040240	FO precision cleaver Mini50GB	1 pc
2040343	Spare blade for FO cleaver	1 pc

Cleaning Accessories

Click cleaner SC-ST

Characteristics

- Suitable to clean SC, ST connectors and adapters with 2,5 mm ferrule
- Cleaning is performed with a simple press of the connector or adapter
- 800 cleaning cycles

Code

2040305

Description

Click Cleaner SC-ST

Click cleaner LC

Characteristics

- Suitable to clean LC connectors and adapters with 1,25 mm ferrule
- Cleaning is performed with a simple press of the connector or adapter
- 800 cleaning cycles

Code

2040306

Description

Click Cleaner LC

Isopropyl alcohol

Characteristics

- Suitable to clean optical fibers before splicing
- Colorless liquid with relative density of approximately 0.80 mg/ml
- Spray can 400 ml

Code

2040317

Description

Isopropyl alcohol 400 ml

Splice wipes

Characteristics

- Suitable to clean optical connectors
- One-layer fabric wipes, white colour, 11x21 cm
- Packaging unit: 280 pcs

Code

2040303

Description

Splice wipes

Fiber optic termination

Stripper, crimping tool

Fiber stripper

Description

Multi purpose stripper ideal to remove the cable jackets of cables with a diameter of 2,5 mm and the optical buffer coating of 250,600 and 900 µm.

Characteristics

Structure	Burnished steel body, handles made of thermoplastic material
Application	Fiber stripping
Mechanical features	Blades with 3 slots of different diameter depending on the fiber coating to strip
Colour	Body black Handles orange

Kevlar crimping tool

Description

Kevlar crimping tool to be used with Tight cables to fix the Kevlar to the connectors.

Characteristics

Structure	Burnished steel body, ergonomic handles made of thermoplastic material
Use	On Tight optical cables with ST/SC connectors
Mechanical features	Wheel to adjust the crimping force; crimping releasable knob
Colour	Body black Handles red

Code	Description
2040052	Fiber stripper

Code	Description
2040088	Kevlar crimping tool for ST-SC connectors

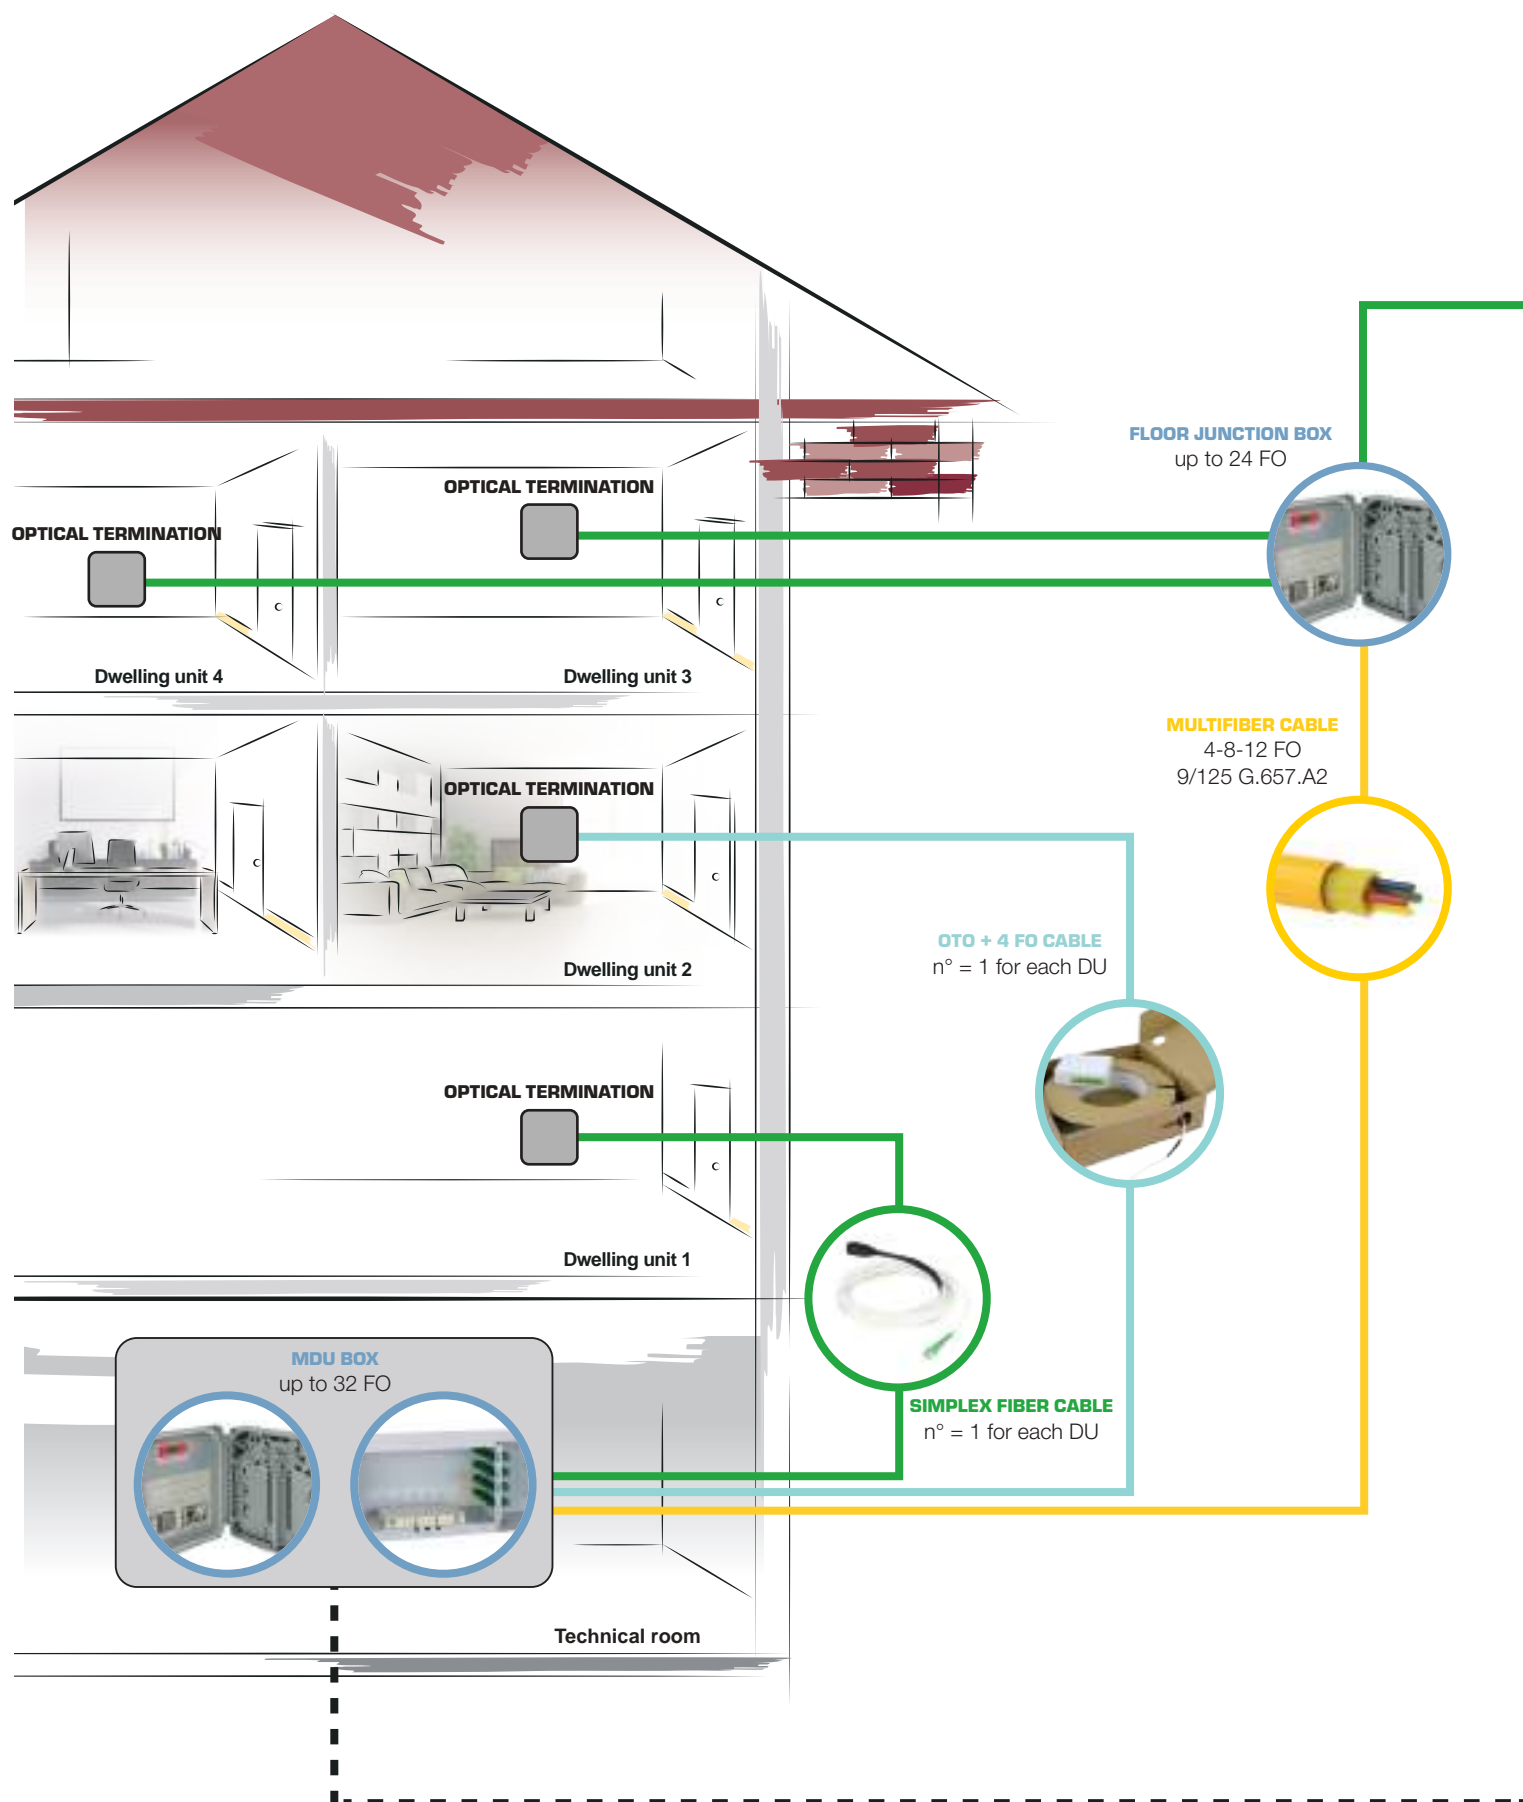

Fiber To The Home

Range of products for the realization of optical infrastructures FTTH both in new and existing buildings. CCS solution includes FO cables, MDU boxes, building entry points, OTO and all the Accessories to perform a state-of-the-art installation.

Multifiber bend Insensitive optical cables

4 to 12 cores indoor or outdoor fiber optic cables with single-mode fibers, 9/125 G.657.A2 Bend Insensitive, 250µm fiber primary coating.

For indoor use: minicore cables with dielectric armour of aramid yarns which grants an excellent pull force value and with LSZH (Low Smoke Zero Halogen) flame retardant outer jacket.

For outdoor use: Loose cables with Kevlar yarns fillers and PE (Polyethylene) outer jacket.

Application and performance

Cable suitable for the realisation of multifiber building cabling systems, for indoor or outdoor use.

They can be laid in pipes or ducts to connect the Building Entry Point to the Fiber Distribution Box or to the Optical Telecommunication Wall Outlet.

Certifications and approvals

Data transmission FO cables according to ITU.G657.A2 and IEC 60794-1-2

IEC 60794-1-2
ITU.G657.A2

Construction characteristics

Cable core	4-8-12 SM fibers ITU.G657.A2 Bend Insensitive
Protection filler	Aramid yarns
Material/outer jacket colour	LSZH or PE/yellow
Outer diameter	From 3 to 3,4 mm
Weight	From 10 to 13 kg/km

Mechanical and environmental characteristics

Use	Indoor or outdoor
Bend. radius during installation	15 x outer diameter
Bend. radius after installation	10 x outer diameter
Max.pull strength	Indoor cables 1000N Outdoor cables 250N
Crush test	1000 N/dm
Installation temperature	From -5°C to +50°C
Operating temperature	from -15°C to +60°C

PULLING BRAID

Preterminated simplex fiber optic cable

Description

G.657.A2 single-mode, tight buffered, simplex fiber optic cable preterminated at both ends with SC/SC APC connectors. Suitable for fiber optic distributions or links in both new and existing installations. To facilitate the installation inside the conduits, one end features a braided guard with inside an SC/APC connector to be assembled.

Available in pre-wired versions with lengths of 10, 15, 20, 30, 40 and 50 m.

Characteristics

Use	Indoor
Cable features	1 single-mode G.657.A2 fiber Diameter: 3 mm Weight: 8 Kg/Km Max pulling force: 400 N Bending radius: 30 mm LSZH jacket Euroclass: Cca s1a,d0,a1
Connectors	SC/APC
Color	Cable: white Connectors: green
Lengths	10 - 15 - 20 - 30 - 40 - 50 mt

Applications

In fiber optic infrastructure for the connection between the home consolidation point to the optical termination point

In existing and new facilities to implement optical distribution

Optical telecommunication outlet

Optical telecommunication outlet

Description

Pre-wired optical telecommunication wall outlet.
Suitable to be used in multifiber building systems for the distribution of connectivity services (antenna/satellite/cable TV signals or internet) provided by the Building Entry Point.
Available both blank and pre-wired with optical cables from 10 to 60 mt terminated on one or both ends.

Reference standard

IEC 60794-1-2: Fiber optic cables
IEC 60332-1-2: Flame retardant property
CPR UE/305/2011: Euroclass Eca

General characteristics

Installation	Wall or inside the Home Consolidation Cabinet
Structure	Plastic 4-port box fitted with 4 SC/APC Simplex adapters with dust-protection shutter, 1 splice tray 4 positions, indoor optical cable of preset length, 4-fibre SM type G.657.A2 pre-terminated with SC/APC adapters on one or both ends

MDU for 4-8 building units

Description

Optical box to be used in multifiber building systems for the termination of building units optical cables.
Compatible with the main Telecom operator fiber access terminals.
Available both blank and fitted for 4/ 8 residential units.

Applications

In fiber optic infrastructures for the distribution of the optical cables to the building units

General characteristics

Installation	Wall or recessed
Structure	Steel sheet body with two separate sections : one for cable termination, the other for the patch cords connections. Equipped with cover, 180° opening door with safety key, roof and base slits, top and bottom cables inlet, sliding structure for shelves and pull-out patch panels, stockpile management with adjustable clips IF PRE-LOADED VERSION: - 4 or 8 splice trays 12 positions - 16/32 SC/SC APC adapters - 16/32 singlemode G.657.A2 SC/APC pigtails
No.of ports	32 for SC Simplex or LC Duplex adapters
Dimensions	W450xD150xH180 mm
Colour	Grey RAL 7035

Code	Description	Packaging
2006050	MDU box - pre-loaded version for 4 units	1 pc
2006051	MDU box - pre-loaded version for 8 units	1 pc
2006040	MDU box - blank version	1 pc

IP65 wall-mounted box 12-position SC Simplex

Description

IP65 optical box with 12 empty positions for SC Simplex adapters suitable for both indoor and outdoor environments, wall-mounted or pole-mounted. It can be used as a MDU or as junction box in multifiber building systems.

Characteristics

Installation	Wall-mounted or pole-mounted
Structure	ABS body, door can be opened up to 180° with key, 2 inlets with cable gland and 12 inlets for drop cables, built-in junction tray, 12-position holder for SC Simplex or LC Duplex adapters
Dimensions	W250xD215xH75 mm
Protection degree	IP65
Color	Grey RAL 7035

Applications

In existing and new facilities as MDU box or floor junction box

Code	Description
2006030	12-position IP65 wall-mounted box

IP65 wall-mounted box 24-position SC Simplex

Description

IP65 optical box with 24 empty positions for SC Simplex adapters suitable for both indoor and outdoor environments, wall-mounted or pole-mounted. It can be used as a MDU or as junction box in multifiber building systems.

Characteristics

Installation	Wall-mounted or pole-mounted
Structure	ABS body, door can be opened up to 180° with key, 2 inlets with cable gland and 24 inlets for drop cables, built-in junction tray, 24-position holder for SC Simplex or LC Duplex adapters
Dimensions	W275xD330xH105 mm
Protection degree	IP65
Color	Grey RAL 7035

Applications

In existing and new facilities as MDU box or floor junction box

Code	Description
2006032	24-position IP65 wall-mounted box

Pre-assembled IP65 wall-mounted box

Description

IP65 optical box pre-assembled with SC/APC adapter and pigtails suitable for indoor and outdoor applications, wall or pole installable.

It is designed for FTTH and FTTB systems where it can be used as optical distribution box.

Applications

In FTTH infrastructures for the distribution of the optical cables to the building units

Characteristics

Installation	Wall-mounted or pole-mounted
Structure	ABS body, 180-degree opening door with safety key, 2 inlets with cable gland and 12 inlets for drop cables or optical patch cords, integrated junction tray, 12-position holder, complete with 8 SC/APC Simplex adapters, 8 single-mode SC/APC pigtails type G.657.A2 and set of screws for wall installation
N. positions	12 for SC Simplex or LC Duplex adapters
Dimensions	W250xD215xH75 mm
Protection degree	IP65
Color	Grey RAL 7035

Code	Description	Packaging
2006031	Pre-assembled IP65 wall-mounted box	1 pc

Home Consolidation Cabinet

With a sober and discreet design, the HCC consists of a recessed metal structure that can lodge the passive and active components necessary for the functioning of the system. The frame of the cabinet is provided with ventilation holes for natural ventilation and has a blind plastic door of white colour. This cabinet can be used not only in FTTH installations but it is suitable for structured cabling and networks of any type like offices, shops and apartments where there is a need for contained dimensions and limited number of points.

Colour	Capacity	Dimensions (WxHxD)	Installation
 White	8 ways telephone splitter 24 ports RJ45	390 x 300 x 110 mm	Recessed

Home consolidation cabinet

Home Consolidation Cabinet

Description

Recessed box to be used in multifiber building systems for the distribution of the telecommunication services (data, voice) inside a building unit.

The cabinet allows the containment of copper and FO cabling together with the necessary active equipment for the functioning of the network. It gathers and switches the services derived from the optical telecommunication wall outlet to the different points inside the apartment.

This cabinet can be used not only in FTTH installations but it is suitable for structured cabling and networks of any type like offices, shops and villas where there's a need for reduced dimensions and limited number of points.

Applications

In new or existing facilities as cabinet in the building units for the distribution of signals over copper cables

In small structured cabling systems

General characteristics

Installation	Recessed
Structure	Metal structure with cable access on the 4 sides, plastic frame and blind door. Fitted with No.1 8-ways telephone splitter, No. 3 empty 8-port patch panels for RJ45 CCS keystone jacks for data distribution, No. 3 snap-in supports to lodge the optical termination box, active equipment or accessories, No. 1 support for the installation of up to 4 additional patch panels (code 2050022), holes for the installation of an outer box for 1 or 2 power plugs, No.2 L-shape side brackets for wall mounting and protection cover.
No.of ports	8 ports pre-loaded with RJ45 telephone jacks 24 blank ports for RJ45 CCS data jacks
Dimensions	W390xD110xH300 mm
Colour	White

Code	Description	Packaging
2050005	Home Consolidation Cabinet	1 pc
2050022	Additional patch panel 8 ports	1 pc

2-position wall-mounted optical box 70x120 mm

Description

2-position empty box for SC Simplex or LC Duplex flangeless adapters for terminating singlemode optical cables up to 4 FO. Ideal for wall installations to prepare the arrival of the fiber optic inside apartments in buildings.

Characteristics

Structure	Plastic material box
N. positions	2 ports for the installation of SC Simplex or LC Duplex flangeless adapters
N. fibers	Max. 4 FO
Dimensions	W120xD70xH24 mm
Color	White

Applications

In fiber optic infrastructures as optical termination box within buildings units

2-position wall-mounted optical box 80x80 mm

Description

2-position empty box compatible with SC Simplex or LC Duplex flangeless adapters for terminating singlemode optical cables up to 4 FO. Ideal for installation on German standard 80x80 mm wall boxes to prepare the fiber optic arrival inside apartments in buildings.

Characteristics

Structure	Plastic material box, metal support for fixing on 80x80 mm plate
N. positions	2 ports for the installation of SC Simplex or LC Duplex flangeless adapters
N. fibers	Max. 4 FO
Dimensions	W80xD85xH24 mm German type
Color	White

Applications

In fiber optic infrastructures as optical termination box within buildings units

Code	Description
2004159	2-port wall optical box for flangeless adpters -70x120 mm

Code	Description
2004160	2-port wall optical box for flangeless adpters - 80x80mm

Support for Keystone adapters

Description

Vimar Plana civil series support suitable for the installation of CCS optical Keystone adapters. Used together with item code 2004089APC, it represents an ideal solution for deriving the access to fiber services from the home consolidation cabinet to a standard 503/504 wall box.

Characteristics

Material	Thermoplastic material structure
Compatibility	CCS optical Keystone adapters
Installation	Fixing on Vimar Plana 503/504 plates
Color	White

Applications

Within building units as optical termination point or for deriving the fiber access from the HCC to the router installation point

Code	Description
2004106	Vimar Plana series support for Keystone adapters

2-position faceplate standard 503

Description

Standard 503 plate with two slanted positions for installation of CCS RJ45 jacks and optical Keystone adapters. Used in conjunction with Keystone adapter code 2004089APC and an RJ45 jack, it can allow copper and fiber connections to be derived from the HCC to a standard 503 wall box.

Characteristics

Material	Thermoplastic material structure
Positions	2 slanted ports, Keystone standard compatible
Installation	Fixing on standard 503 boxes
Compatibility	RJ45 jacks and CCS Keystone optical adapters
Colour	White

Applications

Within building units as optical termination point or for deriving the fiber access from the HCC to the router installation point

Code	Description
2004158	Faceplate with two slanted positions - standard 503

SM SC/SC APC adapter

Description

Singlemode SC/SC APC Simplex adapter for coupling singlemode fiber connectors within MDUs or optical termination and distribution boxes.

Characteristics

Material	Thermoplastic material structure
Connection	SC/SC Simplex APC
Installation	In MDUs or optical distribution or termination boxes
Fiber	Singlemode
Insertion Loss	Typical 0,15 dB
Colour	Green

Code	2007021APC
Description	Singlemode SC/SC APC Simplex adapter

SM SC/SC APC adapter flangeless type

Description

Singlemode SC/SC APC Simplex flangeless-type adapter for mating singlemode fiber connectors, to be used in the 2-position wall-mounted optical boxes codes 2004159 and 2004160.

Characteristics

Material	Thermoplastic material structure
Connection	SC/SC Simplex APC flangeless
Installation	In 2-position wall-mounted optical termination boxes
Fiber	Singlemode
Insertion Loss	Typical 0,2 dB
Colour	Green

Code	2007021FAPC
Description	Singlemode SC/SC APC Simplex adapter Flangeless type

SM SC/SC APC adapter Keystone type

Description

Singlemode SC/SC APC Simplex adapter with Keystone snap-in suitable for the installation in Vimar civil series adapter code 2004106 or in the 2-slanted position plate code 2004158.

Characteristics

Material	Thermoplastic material structure
Connection	SC/SC Simplex APC
Installation	Fixing on civil series adapters or plates with Keystone type connection
Fiber	Singlemode
Insertion Loss	Typical 0,15 dB
Colour	Body: white Adapter: green

Code	2004089APC
Description	Singlemode SC/SC APC Simplex adapter Keystone type

Optical splitters

Description

SM optical splitters, pre-wired with SC/APC adapters at both ends, to be used in the Services Building Entry Point to split the optical signals.

Available sets of 1:4, 1:8, 1:16, 1:32 elements according to the number of building units to be supplied.

Reference standards

ISO/IEC 11801-1/2:2017
ANSI/TIA 568.3-D
ITU-T G.657.A2

Characteristics

Structure	Body of thermoplastic material
Connections	SC/APC
Installation	Services Building Entry Point
Fibre type	SM G.657.A2
Insertion loss	From 7,4 to 16,9 dB
Sets	1:4/ 1:8 / 1:16 / 1:32
Dimensions	From W100xD80xH10 to W120xD80xH18 mm

Patch cords and pigtails

SC/APC pigtail

Description

Single-mode pigtail 9/125 type G.657.A2, terminated with SC/APC connectors.
Suitable to be used in multifiber building systems for the fusion-splice termination of the optical cables inside the Building Entry Point, the Optical Telecommunication Wall Outlet and the MDU Box.

General characteristics

Installation	Building Entry Point, MDU Box, Optical Telecommunication wall Outlet
Cable type	Semi-loose
Connection	SC/APC
Fibre type	SM 9/125 type G.657.A2 Bend Insensitive
Length	2 mt

Reference standard

ISO/IEC 11801-1/2
ANSI/TIA 568.3-D
ITU-T G.657.A2

Code	Description

SC/APC optical patch cords

Description

Simplex SM optical patch cords 9/125 type G.657.A2, terminated with SC/APC connectors.
Suitable to be used in multifiber-building systems for the services interconnection within the Building Entry Point and the Fiber Access Terminal.
Available lengths of 1, 2 and 3 mt.

General characteristics

Installation	Building Entry Point, Fiber Distribution Box, Optical Telecommunication Outlet
Cable type	Simplex semi Tight with LSZH jacket
Connection	SC/APC – SC/APC
Fibre type	SM 9/125 type G.657.A2 Bend Insensitive
Insertion loss	Typical 0,15 dB

Reference standard

ISO/IEC 11801-1/2:2017
ANSI/TIA 568.3-D

Splice trays

Description

Modular and stackable splice trays with cover. Each tray has 2 organizers which can hold 6 splices each.

The following items are available:

- Base unit
- Additional unit
- Cover for splice tray

Characteristics

Installation	On enclosures or optical trays
Material	Thermoplastic with high mechanical resistance
Capacity	12 splices
Colour	White

Code	Description
2008195	12 FO splice tray
2008196	Additional 12 FO splice tray
2008193	Cover for splice trays

Protection tubes

Description

Reinforced heat shrink tubes, standard length 45 mm and 60 mm against crushing and bending.

Ideal to protect fusion splices.

Characteristics

Installation	On fusion splices
Material	Heat-shrink material reinforced with inner stainless steel protection
Lengths	45/60 mm
Outer diameter	2,5/3,5 mm
Colour	Transparent

Code	Description
2008191	Heat-shrink tubes: diam. 2,5-3,5mm , L 45mm
2008192	Heat-shrink tubes: diam. 2,5-3,5mm , L 60mm

Racks and accessories

Designed and manufactured according to the market requirements, Qubix racks are available in multiple versions with a wide selection of accessories and can be customized on the base of the installation requirements.

The range includes:

- racks for Datacenter and Server rooms with depth 1000 and 1200 mm
- floor standing and wall racks
- racks with degree of protection IP55 and IP65
- 10" racks, racks for special applications like Safety and Compact racks
- ventilation systems, cabling management, PDU and further accessories

CCS® range of cabinets and racks offers enclosure solutions that answer the specific needs of different environments, from Datacenter racks with depth of 1200 mm to the smaller cabinets for SOHO applications. New trends and needs come from the market, our R&D Dpt. has therefore revised and improved the range of our racks to offer reliable, functional products combined with a modern design. Specific solutions were also developed for harsh environments with complete range of IP55 racks already configured with all necessary accessories.

Datacenter TECH racks

Description

Datacenter TECH cabinets are suitable to house all kinds of server computers and 19" active components that are available in the networking market. They can house all the 19" accessories and are suitable for the installation of specific accessories with greater depth and weight capacity to contain and support non-modular devices. The range includes cabinets with width of 600 and 800 mm and depth of 1000 and 1200 mm with front glass door and side and rear blind panels or with front and rear grilled doors and side blind panels.

General characteristics

- Steel sheet structure
- Colour: Grey RAL 7035 or Black RAL 9005
- Configurations with front glass door and side and rear blind panels or front grilled door and rear grilled double door with side blind panels
- Swing handle with key and 3- point locking system
- Door opening 180°
- 2-section blind side panels removable with locking key for the 42U and 47U versions; single section panels for the 27U version
- Ventilation slits for exhaust air and holes for the installation under the roof of ventilation units
- Brush strip cable entry on the base of rack
- Roof and floor base panels with removable trapdoors for cable inlet
- No. 4 19" uprights with unit number and adjustable in depth
- IP20 protection degree according to EN 60529
- Earthing kit
- No. 4 levelling feet
- Loading weight: 2000 Kg
- Compliant with standard IEC 60297, EN 61587-1, EN 60917

Wall mounted IP55 cabinets

Description

Wall mounted IP55 cabinets designed for the containment of components for structured cabling and LAN networks to be installed in environments where a high protection degree is required. The range includes cabinets with a depth of 450 or 600 mm, front blind door and a hinged roof.

General characteristics

- Steel sheet structure
- Blind front door
- Locking system with double key locks
- Colour Grey RAL 7035
- No. 2 numbered 19" uprights adjustable in depth for the 450 mm depth version; no. 4 uprights for the 600 mm depth version
- Cable inlets on the base with PG cable glands and plastic gaskets pre-installed
- Hinged roof with ventilation slots
- Roof designed to house forced ventilation units with 2 fans
- Air filters on the sides with external covers
- IP55 protection degree according to EN 60529
- Degree of impact resistance: IK10
- Equipped for grounding
- Loading weight from 80 to 120 Kg depending on the model

Wall mounted IP65 cabinets

Description

Wall mounted IP65 cabinets designed for the containment of components for structured cabling and LAN networks to be installed in environments where a high protection degree is required. The range includes cabinets with depth from 400 to 600 mm, front tempered glass or blind door.

General characteristics

- 15/10 steel sheet body
- Blind or glass front door
- Colour grey RAL 7035
- No.2 19" uprights
- No.2 sendzimir profiles fixed on the door
- Cable entry plate with gasket
- Locking system with double bit key, Ø 3mm
- Kit of grounding screws
- IP65 protection degree according to EN60529
- Degree of impact resistance: IK10 for models with blind door according to EN 62208, IK09 for glass door
- Static load 50 Kg (for cabinet with depth of 400-500 mm) or 60 Kg (for cabinet with depth of 600 mm)

In case of ventilation or conditioning systems installation, the cabinet has to be pre-fitted accordingly

IP55 fans

Description

IP55 fans with grid and particle filter to allow air vent inside the wall mounted IP65 cabinets. To be ordered combined with the IP55 filters and together with the wall IP rack for the correct positioning of the holes on the rack.
Available with a air flow capacity from 40 to 386 mc/h.

General characteristics

Installation	On wall mounted IP65 cabinets
Structure	Fan body in Aluminum; body and external grid in plastic material (UL94 VO)
Air flow capacity	40 m ³ /h, 90 m ³ /h and 386 m ³ /h depending on the model
Dimensions & compatibility	150x150x80 mm -> Rack depth ≥ 400 mm 204x204x98,5 mm -> Rack depth ≥ 500 mm 322x322x143,5 mm -> Rack depth ≥ 600 mm
IP degree	IP55
Colour	Grey for the grid Black for the fan body

Code	Description	Packaging
2011307	IP55 fan 40 mc/h - 150x150 mm	1 pc.

2011328	Cabinet installation of 1 kit IP55 fan + IP55 filter	1 pc.

Small office racks

Wall TECH D350

Small Office TECH cabinet D350

Description

Small Office cabinet with reduced depth (350 mm) and removable side panels. Suitable for housing the necessary equipment and accessories to realize small structured cabling systems.

General characteristics

- Steel sheet structure
- Colour Grey RAL 7035
- Tempered safety glass door with >180° opening
- Safety key
- Removable blind side panels
- No. 4 vertical uprights adjustable in depth to install 19" standard equipment
- No.2 L-shaped brackets for the equipment mount
- Top and bottom cables inlet
- Ventilation slots allow air vent
- Suitable for the installation of forced ventilation units
- IP20 degree of protection according to EN 60529
- Static load 60 kg

Code	Description	Packaging
2020021	Small Office TECH cabinet W600xD350xH370 - 6 Units	1 pc.

Small office racks

Safety rack

Small Office Safety cabinet

Description

Wall mounted cabinet suitable for housing monitor, video recorder or any other device which needs to be protected against unauthorized access.

The devices are mounted on the lid by fixing them on proper 1U brackets while the monitor is installed on the bottom by the use of the available VESA fastening.

General characteristics

- One section steel sheet structure
- Safety double-key lock with diversified encoding
- Tray to lodge the devices 36,5 cm wide, equipped with 1U brackets and adjustable in width between 24 to 48 cm
- 1U brackets are replaceable with 2U ones
- Flaps to fix a 10" 4 sockets PDU
- Ventilation slots on all sides allow air vent. Equipped for the installation of 1-fan ventilation unit
- Pre-sheared profiles grant the cables inlet through the lower part of the side panels and on the bottom
- Bottom fastening to install monitors type VESA 50x50, 75x75, 100x100
- Dimensions W580xH546xD150 mm
- Colour Grey RAL 7035

Code	Description	Packaging

Small office racks

Compact

Small Office Compact cabinet

Description

Compact wall mounted cabinet characterized by small dimensions, hinged locking system with plexiglass window and security key, with 5U fixed 19" rails and 3U adjustable 19" rails. Ideal for small structured cabling systems.

General characteristics

- Steel sheet structure
- Colour: Grey RAL 7035
- Closing/opening system with hinges on the back of the cabinet
- Lock with security key
- Plexiglass window
- 3U adjustable 19" front rails for accessories or equipment with maximum depth of 360 mm
- 5U fixed 19" rails for accessories or equipment with a maximum depth of 80 mm
- Side and bottom holes for the ventilation
- Cable entry holes in the bottom
- Load capacity: 30 kg

Code	Description	Packaging
2010073	Small Office Compact cabinet W537xD150xH475 - 3U adjustable + 5U fixed	1 pc.

Small Office 10" cabinet

Description

10" enclosure for wall or desk installations, RAL 7035 varnished steel sheet structure with safety glass door and removable side panels, suitable for housing devices necessary to realize home and office networks.

General characteristics

- Steel sheet structure
- Safety tempered glass door with 180° opening
- Removable side panels
- Two 10" uprights adjustable in depth
- Top and bottom sides have removable trapdoors for cables inlet
- Dimensions: W358xD270xH386 mm, 7U
- Colour: Grey RAL 7035
- IP20 degree of protection according to EN 60529
- Equipped for grounding

Code	Description	Packaging

Plinths

Description

Plinths for floor standing TECH cabinets to allow and protect cable pass through. The kit consists of No. 4 supports to be installed at the corners of the cabinet and No. 4 removable flanges.

General characteristics

Installation	To be fixed at the base of floor standing TECH cabinets
Structure	Painted steel sheet
Equipment	No. 4 angle brackets, No. 4 removable flanges for the passage of cables
Height	100 mm
Colour	Grey RAL 7035

Code	Description
2011461	Plinth for floor TECH cabinet W600xD600
2011462	Plinth for floor TECH cabinet W600xD800
2011463	Plinth for floor TECH cabinet W800xD600
2011464	Plinth for floor TECH cabinet W800xD800

Accessories

Grounding and lighting

Copper bar for grounding

Characteristics

- Copper bar with No.10 M6 bores L240xD25xH3 mm
- No. 2 36 mm high insulators with M6 bores
- No. 4 M6x14 screws and No. 4 washers

Code
2011103
Description
Copper bar for grounding

Screws and cage nuts

Characteristics

- M6x12 zinc plated steel screws (UNI 7687)
- M6 cage nuts - white zinc plated steel
- Packing unit: 50 pcs

Code
2011013
Description
Screws and cage nuts

LED lamp

Characteristics

- Dimensions: 277x23x36 mm
- Efficiency: 310 Lumen/mt
- Power: 100-230VAC/ 4W
- Cable 1,5 mt long with plug

Code
2011134
Description
LED lamp

Sales Conditions

1.SCOPE

These conditions govern all contracts for the supply of products by Qubix SpA.

Any exceptions will be valid if made in writing within individual contracts.

These terms and conditions also apply to any future contracts between the same parties, except agreed otherwise.

2. DEFINITIONS

The term "Products" means the goods currently manufactured/sold by the Supplier and covered by the contract.

The term "Supplier" means the Company Qubix S.p.A.

The term "Purchaser" means the customer.

3.PRODUCT FEATURES

Information or data on the characteristics and/or technical specifications of products contained in brochures, price lists, catalogues or similar documents shall be binding only to the extent that such data have been explicitly stated in the Contract.

4. TRANSFER OF OWNERSHIP

The transfer of ownership of the products is subject to the full payment of the price by the Purchaser.

5. CONCLUSION OF CONTRACT

The order confirmation entails the acceptance of these general terms and conditions without any reservation.

Every order must be received by Qubix SpA in writing and signed by the Purchaser.

Normally verbal orders are not accepted, any exceptions due to exceptional reasons are totally at the Purchaser's risk.

The Purchaser's order is considered accepted only after the issuance of the order confirmation with all conditions set forth in it.

6. ORDER CANCELLATIONS

The order cancellation of products not held on stock and/or produced exclusively under the Purchaser's order are subject to the following penalties:

Cancellation received within 3 days from the order confirmation: 10% of the order value

Cancellation received within 7 days from the order confirmation: 80% of the order value.

7. DELIVERY

The delivery time listed in the order confirmation is indicative and may be subject to delays beyond the control of Qubix SpA.

Any delay, whether due to Qubix SpA or not, cannot justify the cancellation of the order. Delays due to Qubix SpA may give rise to a claim for compensation only where and to the extent those penalties have been established for that purpose and formalized in writing in advance.

Standard delivery term is EXW Padova Incoterms® 2010, unless otherwise agreed.

8. PACKING

The package is included in the normal list price.

Any special packaging required in writing by the customer will be billed at cost.

9. COMPLAINTS

Any complaint must be in writing and sent to Qubix SpA by registered letter A.R. within eight days from receipt of goods.

Claims relating to the quantity or appearance of products (apparent defects), must be notified by registered letter to the Supplier, under pain of forfeiture, within eight days from the date of receipt of goods. Any claims relating to defects not detectable by a careful inspection upon receipt (hidden defects) shall be communicated to the Supplier by registered letter, under pain of forfeiture, within eight days from the date of discovery of the defect but not later than the warranty period.

By way of exception, claims related to damage from transportation and authorized by the Supplier will have to be communicated to the Supplier within 24 hours of receipt of the goods by sending a copy of the waybill of the carrier, affixed with clear and specific reservations and with full photographic documentation.

10. WARRANTY

The Supplier guarantees the good quality of products by committing, during the warranty period stated below, to repair, or, under his sole discretion, free replace those parts which due to the bad quality of the material or manufacturing defects are faulty, provided this does not depend on:

- natural attrition
- failures caused by incompetence or negligence of the Purchaser
- imperfect assembly (unless the same has not been performed by the Supplier)
- tampering or interventions not authorized by the Supplier

Unless otherwise specified for the type of product, the warranty period is 12 months from the date of delivery and shall expire at the end of the period even though the products were not, for whatever reason, put in place. The warranty claim is subject to compliance with the terms of complaints as specified above. In case of defects, lack of quality or lack of conformity of products, the Supplier is only required to repair or replace them.

The above obligation to repair or replace the Products shall be in lieu of any warranty or liability of any kind required by law (eg. for defects, lack of quality or lack of conformity of the Products) and excludes all other liability of the Purchaser (whether in-or-extra contract) due to defects, lack of quality or non-compliance of products sold (eg. compensation for damages of plant shutdown, lost profits, etc.).

The return of products under warranty must be agreed with Qubix SpA, that will determine the delivery mode of goods.

All material to be repaired must be accompanied by an indication of the fault, otherwise the goods will not be accepted.

11. RETURNS

All returns must first be approved by the sales office of Qubix SpA by sending an authorization form and a RMA number.

The acceptance of returns is subject to sole discretion of Qubix SpA and is conditioned by the following clauses:

- product delivered to the Purchaser by no later than 8 days;
- unopened original packaging;
- current production model;
- return shipping cost prepaid.

12. TERMS OF PAYMENT

Payments must be made in the form agreed and specified in the order confirmation.

In case of late payment with respect to agreed date, the Purchaser must pay the Supplier interests on late payment in accordance with Legislative Decree no. 231/02.

The Purchaser is not authorized to make any deduction from the agreed price, unless prior written agreement with the Supplier. If the Supplier has any reason to fear that the buyer can not or do not intend to pay the Products at the agreed date, he will subject the delivery of products to the provision of adequate guarantees of payment.

13. GOVERNING LAW, ARBITRATION

13.1 This Agreement shall be construed and governed by Italian Law

13.2 Every effort will be made by both parties to settle amicably any disputes, misunderstandings or differences that may arise in connection with this Agreement.

13.3 If such a settlement can not be reached, all disputes arising out of or in connection with the present Agreement shall be finally settled under the Rules of Arbitration of the International Chamber of Commerce of Paris by one arbitrator appointed in accordance with the said rules; the arbitration will be directed in the English Language and will take place in Padova (Italy).

WEEE EUROPEAN DIRECTIVE (2012/19/EU)

Waste from Electrical and Electronic Equipment

The WEEE Directive aims to reduce the volume of waste from electrical and electronic equipment (EEE). It requires that some end-of-life products can not be landfilled but must be managed by a system that provides for separate collection and for a specific treatment of separation, recycling and recovery. According to the RAEE Directive QUBIX SpA has set up all the procedures for the commercialization of EEE of the brands Qubix Spa manages the marketing: - entrust to the group ecoRit the management activities of the end-to-life equipment - cost internalization of WEEE disposal in the selling price of the EEE (WEEE eco-contribution acquired) - enrolment to the National Register of producers as required by Ministerial Decree 25 September 2007, No 185 - affixing of the crossed out bin symbol on individual items covered by the Directive. The crossed out bin symbol indicates that the end-of-life product must be separately collected from other waste and separately deposited at authorized collection centers, in the cases and manner prescribed by national laws of EU countries, to avoid adverse effects on the environment and human health. Illegal disposal of end-of-life products is sanctioned by law. It is in any case appropriate that the consumers verify that in his country the product is actually subject to the WEEE regulations.

Products distributed by Qubix Spa that are included in the WEEE European Directive 2012/19/EU
